MAGLITE®

QUALITY

Offering the best heavy-duty and personal portable lighting on the market, Mag Instrument fosters a tradition of engineering, balanced optics, durability, reliability and superior performance.

REPUTATION

A champion of free enterprise and U.S. based manufacturing, Anthony Maglica is the president of Mag Instrument and the creator of the MAGLITE® torch. Since 1979, MAGLITE® torches have been synonymous with built-in American quality. Every torch represents the culmination of more than 40 years of research, development and refinement.

INNOVATION

Under Mag Instrument's Continuous Product Improvement policy, in-line changes are regularly made to upgrade product performance and/or durability. The latest and most accurate performance data for each individual torch can be found on the retail packaging.

HOW TO SELECT A TORCH

The most powerful MAGLITE® torches are superb for the right environments and applications, but may be excessive for more basic everyday tasks. Instead, focus on finding the right performance for the task at hand – this will maximise utility while minimising size and weight. Above all, you are looking for the right combination of brightness, beam distance and battery life.

Use the table to help identify a suggested brightness and beam distance for your most common activities and environment. ANSI FL1 ratings are displayed against every torch in this directory.

Professional and frequent torch users should also consider the merits of a rechargeable torch and charging dock for long-term economy and convenience.

Typical Activity	Output Category	Suggested Brightness
Maintenance Tasks & Everyday Use	Low	0 - 99 Lumens
Personal Safety & Situational Awareness	Medium	100 - 299 Lumens
Area Searching & Attracting Attention	High	300 - 599 Lumens
Emergency & Specialist Use	Very High	600+ Lumens

Typical Environment	Range Category	Suggested Beam Distance
Immediate Area	Very Close	0 - 49 Metres
Indoor Area	Close	50 - 99 Metres
Large Indoor Area	Medium	100 - 199 Metres
Outdoor Area	Long	200 - 399 Metres
Large Outdoor Area	Very Long	400+ Metres

SPECIAL FEATURES

While the initial cost of a rechargeable battery is significant, it is engineered to withstand up to a thousand charge/discharge cycles.

Activity based functions with five different functional modes – Full Power, Low Power, Strobe, Eco and Momentary On/Off.

Many of the MAGLITE® LED torches have electronic switches that offer a wider range of functions than typical mechanical-switch torches.

Some MAGLITE® torches are simple on/off torches. Others, however, allow the user to choose from a variety of functional modes.

MINI MAGLITE® AA/AAA, ML25LT™ torches convert quickly to a free standing candle mode.

Ultra-low-power-drain mode that, thanks to excellent torch optics, still provides useful light while greatly extending run time.

National Tactical Officers Association, this product has achieved “Recommended” status under the NTOA’s Member Tested & Recommended Program.

MAGLITE

RECHARGEABLE LED

ML150LRX™ RECHARGEABLE

Code: ML150LRX-4019F Colour: Stealth Matte Black

- Very high output and very long range
- Lithium Iron Phosphate battery enables 2.5 hour fast-charge capability
- Storage cradle regulates power to eliminate overcharging
- System can be powered by a 12V DC vehicle socket or 240V AC household socket
- Stealth matte finish for tactical users

Beam Distance	Lumens	Beam Intensity	Run Time	Water Resistant	Drop Resistance	Batteries
458 m	1082 / 138 / 25	52555 cd	High 3 h 15 m / Low 18 h / Eco 79 h	✓ IPX4	1 m	LiFePO ₄

Length	Weight with Batteries	Rechargeable	240 & 12 Volt Charger	Electronic Switch	Multi-Mode	ECO Mode	NTOA
271 mm	439 g	✓	✓	✓	✓	✓	✓

ML150LR™ RECHARGEABLE
