About ICB

ICB is the innovative producer of NoStik® products, a brand that offers a guarantee of quality and innovation. NoStik® represents a wide range of non-stick products, such as reusable baking and protective sheets, shelves, trays & bags. To the consumer, NoStik® represents quality and innovation and it is the reference in the consumer market when it comes to non-stick applications.

Since 1990 our products are manufactured proudly in Belgium. Our unique fully automatic production facility allows us to control quality in all stages of the production process. On top, we can guarantee our clients short lead times thanks to our stock holding capacity in our 4000m² large warehouse.

NoStik® Goals

Fat Free Cooking

Thanks to their non-stick properties our products don't require added butter, oil or cooking fat during the cooking process. Therefore our products are a handy help for consumers who want to start up or continue a diet or who just want to maintain a healthy lifestyle.

Reusability

Products symbolizing this goal are, for example, the NoStik® Bake Liner, Pan liner, Crisper Baskets, Cake Tin Liners, Adjustable Oven Liner & Crisper Shelves. Several products manufactured by NoStik® are a reusable alternative for disposable products such as parchment paper, wax paper, aluminum foil and trays. Therefore our products are a handy help for consumers who want to save money and help to reduce waste.

Products symbolizing this goal are the NoStik® Bake Liner, BBQ Liner, BBQ Trays, Oven Liner and Freezer Bags.

Keep it Clean

Several products manufactured by NoStik® are made to keep your cooking appliances clean. Avoiding mess in your kitchen reducing time needed to clean after cooking.

Products symbolizing this goal are the NoStik® Bake Liner, BBQ Liner, BBQ trays, Oven Liner, Gas Range Protectors, Deep Fry Filter and Toast Bags

NoStik® Materials

All products manufactured by NoStik® are made out of woven glass fabric coated with PTFE or out of pure PTFE.

Woven glass fabric is made by interweaving threads crosswise (Weft) and threads lengthwise (warps). Interweaving can be done in different ways resulting in several types of fabrics. The most visible difference in fabrics is the one between closed and open mesh fabrics. In closed fabrics a further deviation can be made between 0.07mm, 0.12mm and 0.22mm fabrics. In open mesh fabrics a deviation between 1x1mm, 2x2mm, 4x4mm and 6x6mm can be made. Each of these fabrics are used to make 1 or more of our products.

PTFE (Polytetrafluoroethylene) is produced by the polymerization of tetrafluoroethylene. PTFE used to produce NoStik® products is traditionally a milkywhite dispersion. Key features of PTFE are its non-stick properties, chemical inertness and high heat resistance up to 260°C.

Bake Liner

Bake & Fry with Nostik®

Features

- Reusable alternative for baking paper
- Fat free baking without butter
- Easy to clean
- Cut to size
- Keep your trays clean
- Heat resistant up to 260°C (500°F)

Size: 33 x 36cm

Code: 1BBB477
