## WELCOME TO OUR DIRECTORY

### OUR STORY

In 2009, Ken Zorovich and Yos Kumthampinij founded **ZOKU** when they phased out their design studio to pursue a new challenge. After years of helping other companies with product development, it was time to launch their own lifestyle brand.

With a simple philosophy in mind (that the most thoughtful products should function as beautifully as they look), the two friends began dreaming up new solutions to familiar challenges.

One of the first concepts they landed on was a device for freezing popsicles rapidly. Ken and Yos constructed a prototype from aluminum cigar tubes and surprised even themselves with how well it worked. After a little more experimentation, the iconic Quick Pop Maker was born! Its launch made **ZOKU** a household name seemingly overnight, with Wired magazine calling the Hoboken-based company “a scrappy designer’s success story.” The rest is history.

Today, **ZOKU** continues to develop innovative products to meet a growing range of customer needs. From space-saving storage solutions to revolutionary on-the-go products—each is painstakingly crafted according to Ken and Yos’ original vision:

**the perfect balance of form and function.**

1 TREE PLANTED**

**TREES ARE COOL  
THAT'S WHY WE'RE PLANTING  
THEM!**

## **TREE PLANTING PROGRAM**

**ZOKU** is excited to announce our **Trees Are Cool** tree planting campaign in partnership with Eden Reforestation Projects. For every one of our Vacuum Insulated Stainless Steel bottles or tumblers purchased, **ZOKU** will plant a tree on your behalf.

By choosing to use a **ZOKU** bottle, you are significantly reducing the use of single use plastic and are also giving back to the planet.

### **TREES KEEP THE EARTH COOL**

Trees enrich our lives in so many ways that are visible and invisible. They are the quiet and mighty heroes of planet earth. They produce oxygen and consume CO2 helping to make our planet cooler, They literally provide the necessary environment for life to thrive on earth. They create habitats for wildlife, protect land and shorelines from erosion, and beautify landscapes.

### **HELPS LOCAL COMMUNITIES**

In many parts of the world rapid deforestation has led to topsoil erosion threatening farmers ability to grow food.

Mangrove forests are threatened and help protect breeding grounds for all kinds of birds and marine life. Planting trees in these sensitive areas will help rebuild not only these delicate ecosystems, but will also help grow the local economies close to the forests.

### **TREES ARE A PART OF EVERYDAY LIFE**

In addition to environmental protection, trees provide materials for countless products we use every day. Our homes, furniture, sports equipment, and musical instruments can all be made from wood. They even provide a sturdy place to tie our hammock to, or a quiet retreat to play an acoustic guitar under.

### **FOR MORE INFORMATION**

If you want to learn more about this program, please visit [zokuhome.com/trees](https://zokuhome.com/trees) or [edenprojects.org](https://edenprojects.org).
