

Edmonton and District Kart Racing Association

2024 Supplementary Regulations – UPDATE 1

Effective Date: June 18, 2024

1. **Micro MAX gearing will be fixed at 14:73** (as per the original 2024 EDKRA Supplemental Regulations).

Background:

- a. RMC Canada Technical Regulation 2.1.3 was updated for 2024 to change Micro MAX gearing to 14:72 (previously 14:73).
 - b. Max Karting Group's 2024 Supplemental Regulation 20 remains with gearing of 14:73 (as in prior years).
 - c. Accordingly, EDKRA will continue to run to the Max Karting Group regulations, as Micro MAX is not offered at the National level.
2. **Mini MAX gearing will be fixed at 13:80** (no change) **and weights will be fixed at 260 lbs, for all cylinders.**

Background:

- a. With the introduction of the new 2024 cylinders, there was discussion of older cylinders having a performance advantage and of trying balancing this performance advantage with a weight adjustment for old cylinders.
- b. Based on our observations, it is not possible to determine whether a real performance advantage / disadvantage exists. Further, most competitors have switched to the new cylinder.
- c. Accordingly, no weight adjustment will be applied to any cylinders.
