

## BAUER NME ONE GOALIE MASK ADJUSTMENT INSTRUCTIONS

For a secure fit, adjust the backplate straps so that the elastic is double thickness when passing through the slot. When all straps are securely fastened, the chin cup should fit snugly against the chin and the front edge of the mask shell should be  $\frac{1}{2}$  inch (12 mm) above the eyebrows. See attached diagram.

This is a technical, non-safety related instruction to ensure the goalie mask complies with the prevailing standards.
