NABUK LEATHER

Protect against excessive sunlight, dryness and heat:

Sunlight will fade and dry out the leather.

Dryness will cause the leather to crack.

Heat will dry out the leather and cause further damage.

How to remove spots and stains:

Blot excess liquid up as quickly as possible with a clean microfibre cloth.

If necessary, use clean lukewarm water only and let dry naturally. Do not dry with hair dryer, etc.

If water is used, clean the entire area where spot occurred seat cushion, arm, etc.

DO NOT RUB.

How to remove butter, oil or grease:

Wipe excess butter, oil or grease off the leather with a clean microfibre cloth. Then leave it alone as the spot should dissipate as much as possible into the leather in a short period of time.

Do not apply water or try to wash the butter, oil or grease spot.

How to remove chewing gum:

Place ice cubes in a plastic bag and apply on the chewing gum. Wait several minutes, lift the ice bag and remove the chewing gum.

General Care

DO NOT USE CHEMICALS, SADDLE SOAP, CLEANING SOLVENTS, FURNITURE POLISH, OILS, VARNISH, ABRASIVE CLEANERS, SOAP OR AMMONIA WATER.
