2.5m drop

Chrona 7

Single rectangular canopy
7 pendants
2.5m drop

Roest 14

Single rectangular canopy
14 pendants
2.5m drop

loci™

(Available for trade only)

Loci, which in Latin means 'centralized sources of power,' refers to the series' innovative method of achieving hundreds or thousands of singular points of light in an installation.

Each sculptural lighting fixture is based on a system of glowing acrylic pixels internally lit using the light-carrying qualities of fiber optic cable. Each installation is illuminated from a single illuminator hidden above the canopy, saving energy while maintaining brightness. Even when not illuminated, the formation catches the light and creates a dynamic focal point.

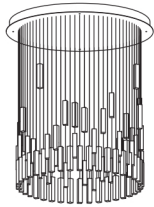

Loci pendants are available in single-canopy and multi-canopy arrangements.

Custom arrangements are available upon request.

Wave

Three tiled rectangular canopies
120 cube pendants
2m drop

murmurations™

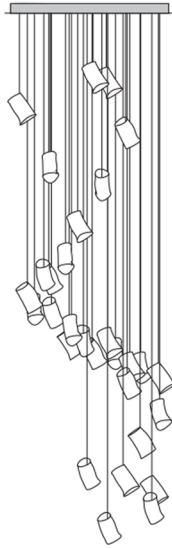

Murmurations are custom installations inspired by a breathtaking natural phenomenon. Flocking is considered an emergent behavior arising from simple rules that are followed by individuals without any central coordination. By creating our own simple design rules, we are able to create dynamic light installations comprising of a single layered cardboard pendant. These chandeliers are scalable from few to many pendants and can be customized to accentuate any space.

Graypants' Murmurations chandeliers are designed to complement any type of project. These are available as project-specific custom installations of any size using our standard Moa pendants.

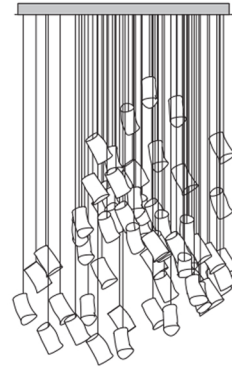

| Design | SKU | EAN | Size |
|-----------------------------------|--------|---------------|-------------------------|
| Tornado Pendant Configuration | GP2017 | 8718531273221 | Ø 91, H 300 (cm) |

Three 2ft x 4ft (0.6m x 1.2m) canopies
142 pendants
2m drop

prop ceiling system™

(Available for trade only)

The Prop panel is a perforated steel unit, which can be combined in numerous combinations to create a wide variety of ceiling systems. The strength of the Prop panels lies in their ability to be endlessly combined into a Prop Ceiling System, accommodating integrated lighting and acoustical needs.

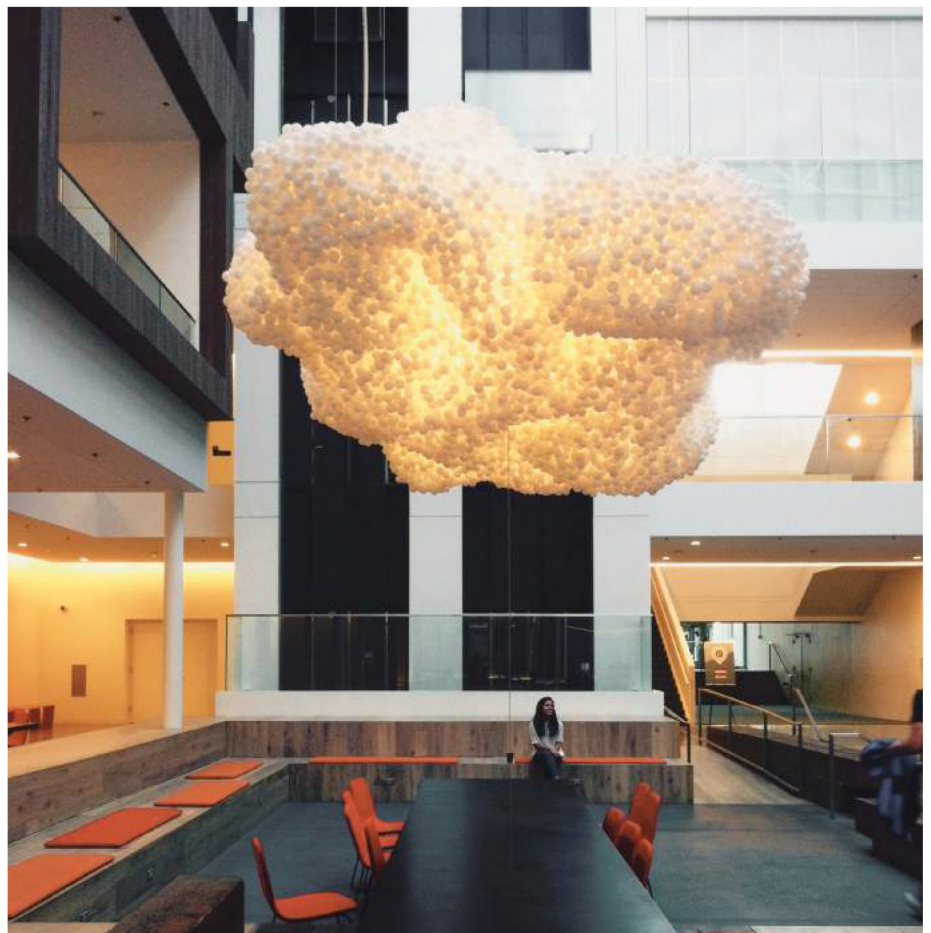

**Pricing varies based on project.
Contact us for more information.**

cloud installations

(Available for trade only)

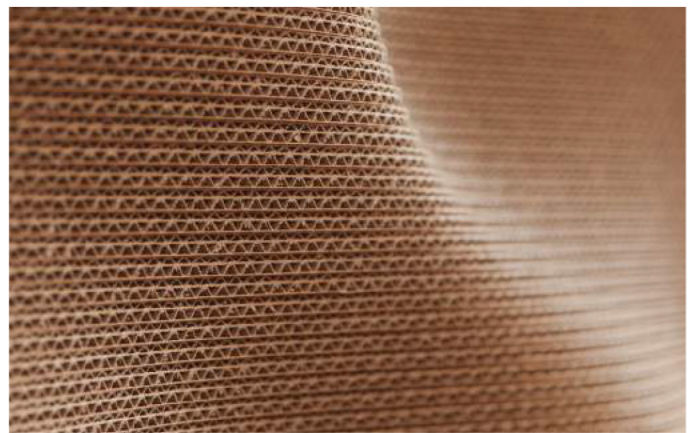

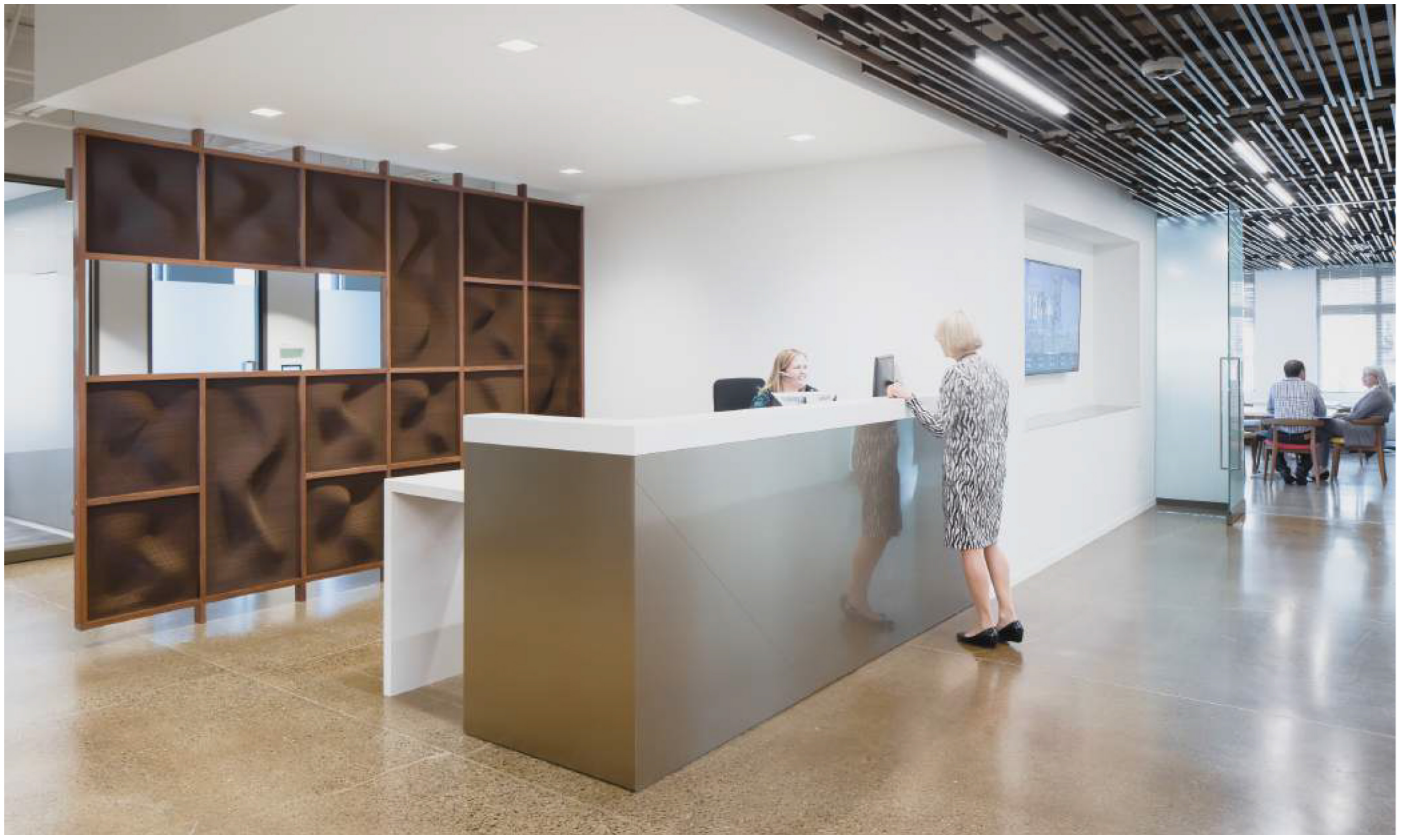

In clouds, some see darkness. We see light. Hand-crafted from as many as 30,000 ping-pong balls, each cloud chandelier is as unique as the environment in which it hangs. With fully programmable LED color lights, they are luminous, supple and constantly in motion – just like an afternoon cloud that gently drifts through the day.

**Pricing varies based on project.

wave panels

(Available for trade only)

Commercial and residential panel partitions should inhabit a space, not divide it. Responsibly crafted from recycled cardboard, Wave Panels re-imagine how we use space. With inherent acoustic properties and stunning visual effects, the multifunctional sculptural panels are custom-designed with varying levels of translucence, yielding privacy without isolation. Wave Panels are also fully compatible with standard ceiling systems, affording an elegant upgrade to acoustic ceiling tiles. Freestanding residential tri-fold room dividers are also available.

Pricing varies based on project. Contact us for more information.
