

Eternity High Stool, H 69

Coffee shell or wood waste mixed
with post-consumer e-waste

The High Stool version of the acknowledged Eternity Chair. The organic shell is made of Matek®, our patented waste material mix. The waste materials used for this chair come from post-consumer e-waste mixed with either wood or coffee waste, depending on the colourway. The Eternity shell is mounted on a 20% recycled metal frame with a gunmetal finish. The embracing design of the shell seat makes the High Stool as comfortable as a dining chair. Available in different Matek® and upholstery options.

Mater Sustainability Factsheet

Matek™

Matek®

In alliance with large corporations, Mater explores new technology that recycles industrial fibre and plastic waste. This results in five new unique patented materials under the name Matek®.

Read more about Matek [here](#)

Steel

Our Steel is composed of 20% recycled steel. Steel is a strong and light material with the quality that it can be processed in unlimited ways.

CO₂ Footprint

At Mater, we believe in the importance of transparency. By doing Life Cycle Assessments (LCA) on our furniture, we can analyse the total climate emission for each of our product's lifespan.

Mater Take-Back

We unhesitatingly offer to take all our furniture made from Matek® back at the end of its life to recycle it into new furniture.

Repair for long lasting

Good products, are made to be used. To give the products the longest possible life, we want to make it easy for you to repair them yourself.

Contact our customer service for more info [here](#)

Green energy

This product is produced in a production facility that is 100% powered by hydropower – a renewable energy resource.
