

MILLA&MILLI - MARBLE FINISHES

Honing makes the surface smooth and flat and gives the material a matt and somewhat used appearance. The tones of the colouring are therefore softened and almost dimmed.

Brushing finish is obtained using tools equipped with abrasive brushes; this technique confers an orange-peel appearance, with a slightly wavy texture evocative of silk.

Polishing exalts the colour, the veining or the intrinsic characteristics of every type of marble, taking it to the maximum intensity and brilliance.

With **Ipogeo® Origo** finish marble is transformed and shaped like clay. Different colour ranges and veins are given prominence in order to offer sensory stimulation.
