Technical Info EN

2020

The close relationship between Elisa Ossino and geometry is translated to the Viccarbe collection thanks to a new range of side tables.

Trino is born with a sculptural soul and stage vocation, with the inherent elegance of a design capable of expressing and complementing all types of interiors. The new Ossino tables are also easy to move thanks to a handle available in three different finishes: metal, solid oak and marble.

Function and form meet again on this occasion to promote conversation between objects and space.

Elisa Ossino

Elisa Ossino is an architect and interior designer. Born in Sicily, she trained in Milan, where she studied at Politecnico. In the year 2006, she established Elisa Ossino Studio focusing on residential and commercial interiors, product design, art direction, set design and styling.

Her works combines geometrical abstraction, monochromes, metaphysical and surrealist references, giving birth to a coherent and allusive relationship between space, light, and objects. A sort of scenic suspension inspires Elisa's style, bringing in every project a peculiar form of lightness. Essential lines and geometries are the distinctive features of her designs, giving to the space they are located in a deep scenographic feeling.

Next to her Studio activity, Elisa Ossino pursues a research that brought her to create together with other partners, in 2004, a kids design brand, Nume, for which she designed the furniture collection along with its visual identity.

In 2010, she established with others the Officina Temporanea project, combining design and artistic expressions, with a particular attention to social contents. In her recent explorations, there is a renovated interest for visual arts and multimedias' potential linguistics. In 2019, together with Josephine Akvama Hoffmeyer she creates H+O, a brand dedicated to surface design and inaugurates the apartment gallery located in the historic Brera district in Milan.
