

## Leónidas

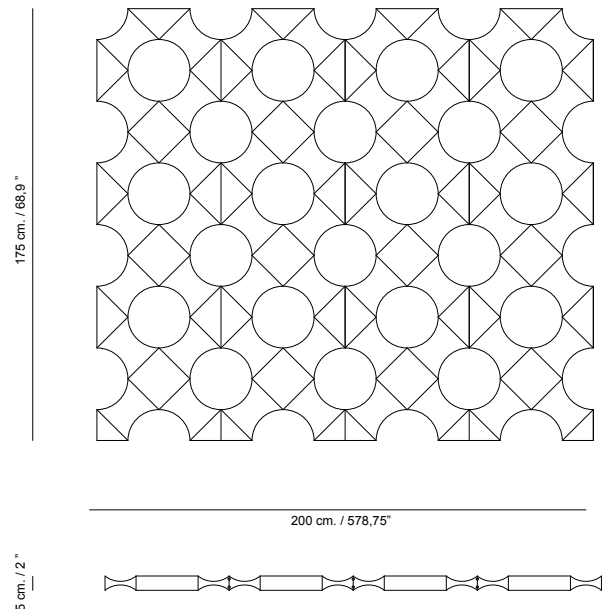

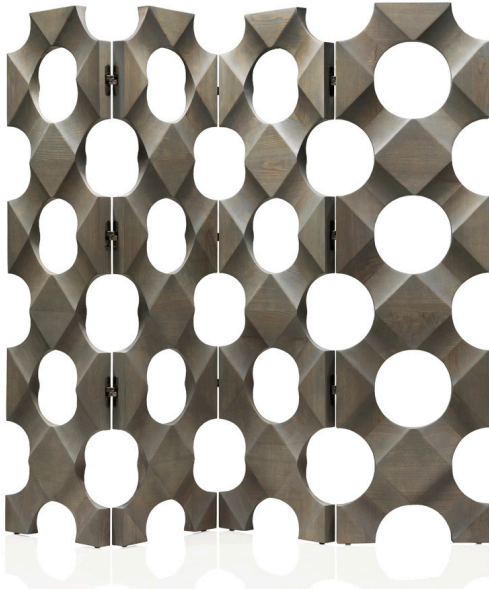

Paco Camús 2017

Leonidas is a lattice work that filters the light and sight. This lattice has a triple interpretation: firstly, we have a two-dimensional grid of perfectly aligned round holes, secondly we have a set of reliefs forming squares and circular grooves which integrate with orderly with the holes grid and provide an important three-dimensional factor to the whole; and lastly we have the typical accordion-shaped semi folding of this typology of elements providing an even more interesting volumetric complexity

Leónidas es una celosía que tamiza la luz y la vista. Esta celosía tiene una triple lectura: en primer lugar tenemos una retícula bidimensional de agujeros redondos perfectamente alineados, en segundo lugar, un juego de relieves que va formando cuadrados y surcos circulares que se integran ordenadamente con la retícula de agujeros, y aportan un importante factor de tridimensionalidad al conjunto, y por último el semiplegado con forma de acordeón típico de esta tipología de elementos y que proporciona una complejidad

### Shipment information

Qty	1 box
Volume	0,48 m <sup>3</sup> / 16,95 ft <sup>3</sup>
Gross weight	90 kg. / 198,5 lb.
Item dimension (width x depth x height)	185 x 60 x 43 cm. 72,85" x 23,62" x 16,93"
