Jackson Coat / Hat Stand  
Sean Dare, 2009

## Jackson Hatstand Assembly

It is recommended that 2 people assemble the Jackson Hatstand.  
The central mount has a locking plate located on each face (6 in total)  
Place each stand loosely into the corresponding locking plate, until all six are loosely together.  
Place the tapping block on top of the central mount.  
Using a hammer, GENTLY tap the tapping block so the central mount slowly moves down into position.  
When the central mount is in the final position all components will be tight and locked into position.  
To test, you should be able to lift the stand without any of the components coming loose or falling out.
