

COLLAGEN ACTIVATOR

Our Collagen Activator is the ideal supplement to support skin health and so much more. It includes a patent-pending ingredient, that significantly increases collagen production, to protect your skin, bones, muscle and joints. This unique formulation may also improve biological age and promote longevity.

HOW TO USE

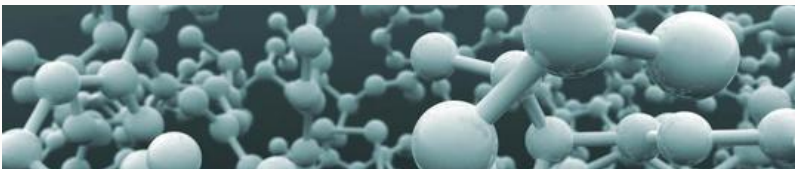

We recommend taking one sachet per day (11,5g), diluted in a glass of water.

WHEN TO USE

Preferably after a meal

KEY INGREDIENTS KEY INGREDIENTS KEY INGREDIENTS KEY INGREDIENTS KEY INGREDIENTS KEY INGREDIENTS

COLGEVITY™ (8.4G)

Our patent-pending collagen precursor, developed with ETH scientists, increases collagen synthesis and extends lifespan and healthspan in model organisms. It consists of three amino acids - glycine, proline, and hydroxyproline - the building blocks of collagen fibres.

CALCIUM AKG (1G)

Naturally found in our body but declines with age. Involved in collagen production and can improve skin appearance. Supports mitochondrial health, lowers inflammation and has been shown to reverse biological age. The Calcium form is used for best bioavailability.

ACEROLA CHERRY EXTRACT (150MG)

Contains highly bioavailable vitamin C. Strengthens your immune system and provides cardioprotective effects. Vitamin C plays an active role in collagen synthesis as it stimulates natural collagen production and helps keep your body's collagen network strong.

ASTAXANTHIN (4MG)

A carotenoid and red pigment found in algae. It is one of the most powerful antioxidants in nature. Highly anti-inflammatory, reduces oxidative stress, protects skin from UV damage and enhances collagen production to smoothen fine lines and wrinkles.

BENEFITS YOU CAN EXPECT

First weeks

Better hydrated skin and stronger hair & nails

Long term

Firmer skin, improved mobility and enhanced youthfulness

After a few months

Reduced fine lines & wrinkles and improved joint wellbeing

COLLAGEN ACTIVATOR TAGLINE

Support natural collagen production for healthy skin and joints.
