## Garage materials and accessories

**Aluminium Composite**  
Strong and light: a polymeric core enclosed between two aluminium sheets insulate the garage and protect it from shocks.

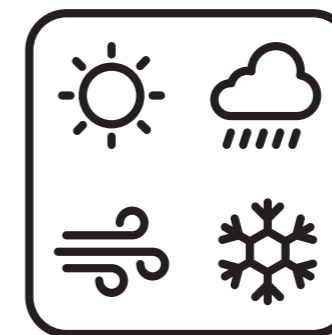

**HPL: High Pressure Laminate**  
Several sheets of kraft paper impregnated with phenolic resins, glued between two decorative layers using heat and high-pressure, create an extremely stable, durable and homogeneous panel.

#### Shockproof

Enjoy your lawn without fear for your robot mower. Our garages are fixed to the ground independently of the robot's base station, so any impact with the garage will not affect the robot or its charging station.

#### Weather resistant

Maximum protection from the elements, because your lawn will not be always basking in the morning sun or being washed by gentle rain. Our garages are made to survive the harshest weather, from tropical sun to hailstorms.

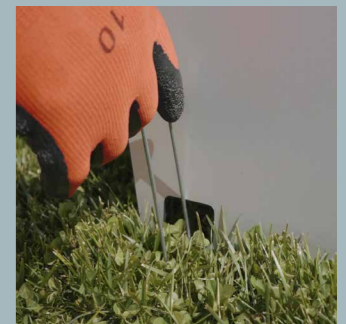

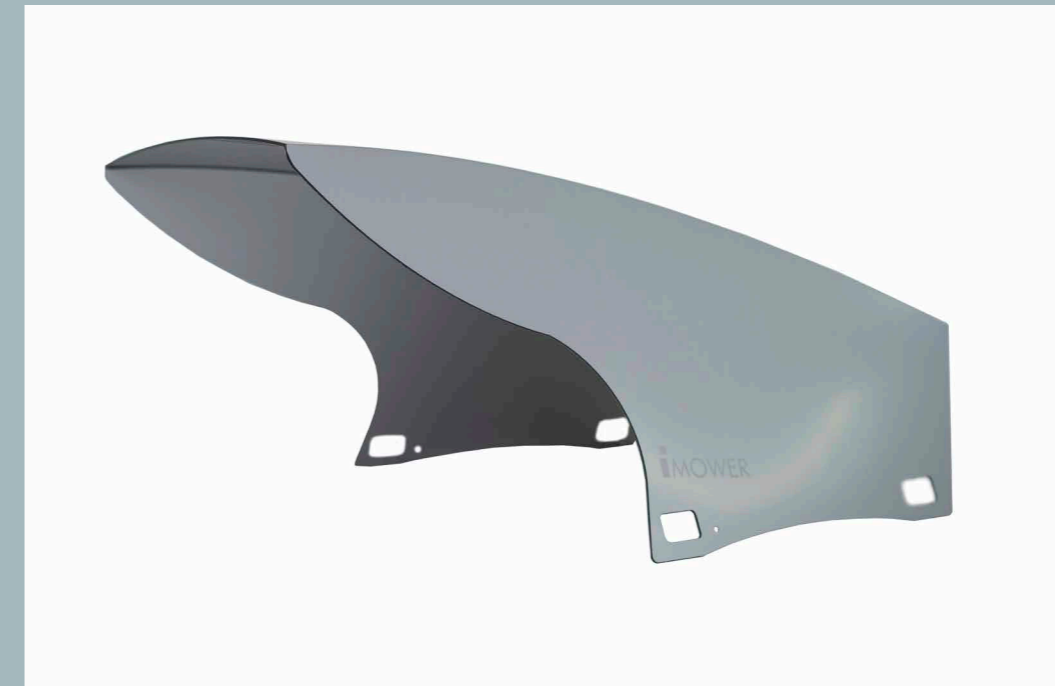

#### Long lasting

Our garages are made to last, without risk of warping, rusting or losing their colour, thanks to a strong build and quality materials. Idea Mower garages effectively extend the life of your robot lawn mower.

#### Easy installation

Our garages are easy to install and include all the necessary hardware for assembly and ground fixing. Instructions are included with the garage and can be downloaded from our website.

## BASIC

### Simply, brilliant garages

**COMPATIBLE ROBOTS**

Ambrogio Robot L 15/Twenty/Twenty 25/Twenty 29/Zeta R  
 Bosch Indego XS300/S500/M700/S+500/M+700

Plattaform

# 360° PROTECTION

Protects the charging station transformer and provides additional space for storing garden tools.

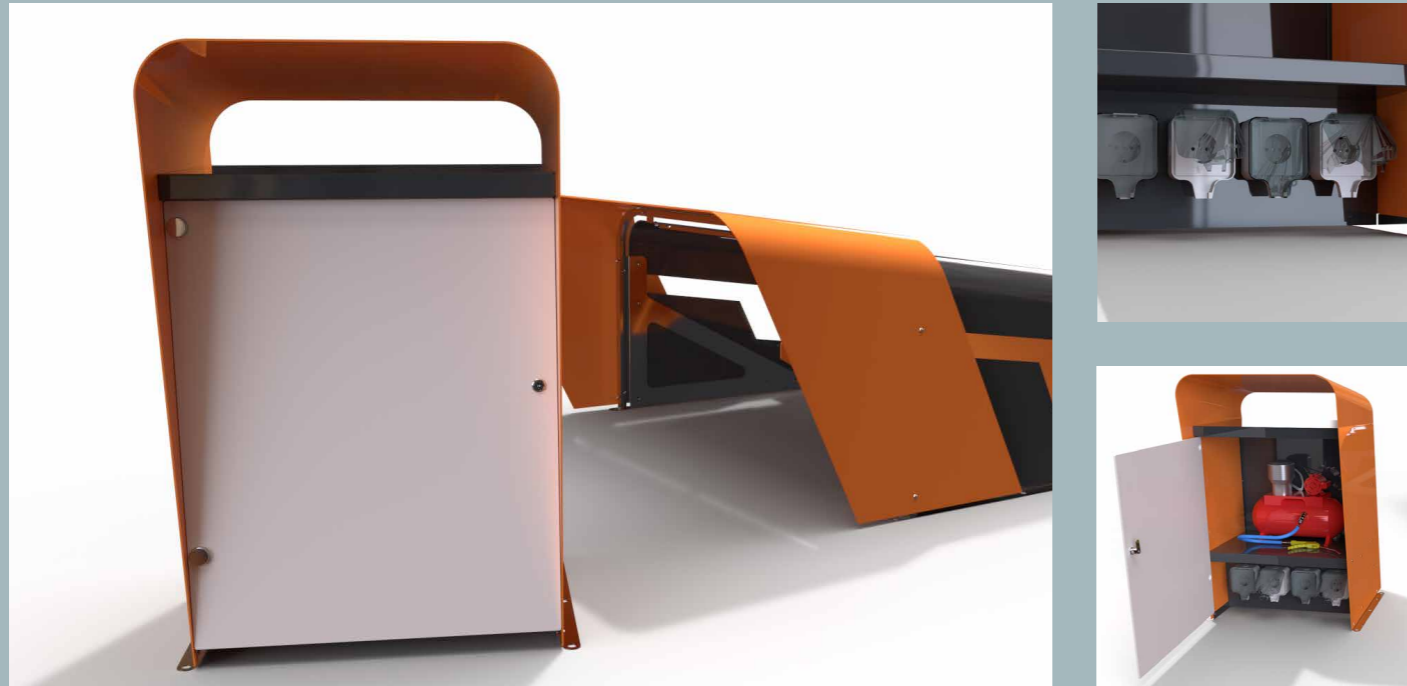

Protects the lawnmower robot and its charging station from the sun, weather, and impacts during charging.

## Plattaform

Facilitates garage installation and prevents grass growth around the charging station.

#### FEATURES

- Service locker, perfect match to Neo Targa garages.
- Ideal for the electrical connection of the robot and reference stations like EPOS or RTK.
- To store spare parts, compressor, cleaning kit etc.
- Ground fixing.

#### DIMENSIONS

660x660mm, h 995mm.

#### MATERIAL

- Composite aluminium, 3mm thick.
- Stainless Steel.

#### OPTIONAL

IP66 watertight electrical sockets.

#### Colours

Many colour combinations available, to be coordinated with Idea Mower's garages.

## Independent solutions for lawnmower robot protection

Idea Mower goes beyond simply providing robotic lawnmowers, offering complete solutions. We create customized garages for each robot, specifically designed for its technical and physical characteristics. These garages offer optimal protection from weather elements and accidental damage, with dimensions ideal for easy maintenance and charging access.

Our goal is to create an ideal environment for robotic lawnmowers, combining tailor-made garages with their technical and physical requirements and leveraging the capabilities of advanced RTK data transmission systems to maximize performance.

Idea Mower's story began ten years ago when robotic lawnmowers were not as common as they are today, and the idea of a garage for robotic lawnmowers was not widely considered. However, recognizing the importance of protecting robotic lawnmowers from environmental damage, we started designing and producing garages and covers specifically tailored for them.

Our company stands out for its attention to design, engineering, and compatibility of our garages with robotic lawnmowers from all manufacturers. We work closely with installers, installer groups, distributors, and even robotic lawnmower manufacturers, listening to their requests and feedback to develop products and accessories that enhance the overall robotic experience in the garden.

Many garages sold on the European market today are designed and manufactured in our facilities and marketed under our clients' brands.

By choosing Idea Mower products, you can rely on reliable and design-enhanced products that improve the efficiency and longevity of your robotic lawnmowers.
