- ___ Choose the products that fit in specific areas

Plan your time line

- _____ Date of measuring
- _____ Date of ordering
- _____ Date Product arrives
- _____ Date to Install
- _____ Who's installing

Notes

What is a store front and how to make it awesome

Your storefront is the main entrance wall where students enter and exit your kitchen to get their food. This wall may have multiple doors and some equipment and perhaps cash registers. The following signs and graphics will help your storefront front stand out and look amazing.

What makes a great Serving Area for efficient traffic flow.

Good management of the kitchen areas is the most important element in kitchen space traffic flow. We suggest all signs and graphics should be infomative ... not distracting to the students but help them choose quickly and efficiently while gathering their food.

All of our signs or graphics are durable and easily installed to the walls/ceilings ... eliminating messy tapes and glues.

Identify your serving line

A quick guide to help you identify your unique serving traffic flow.
