This receiver also features Android Auto, which extends the Android platform into the car in a way that's purpose-built for driving. Android Auto automatically brings you useful information and organizes it into simple cards that appear just when they're needed. It's designed to minimize distraction so you can stay focused on the road ahead.

Apple CarPlay

This receiver also features Android Auto, which extends the Android platform into the car in a way that's purpose-built for driving. Android Auto automatically brings you useful information and organizes it into simple cards that appear just when they're needed. It's designed to minimize distraction so you can stay focused on the road ahead.

Keep your factory features and expand your level of in-vehicle connectivity with Diamond Audio and iDataLink Maestro RR2. When your MSHDHU14 receiver is installed in your 14+ Harley Davidson using the iDataLink Maestro RR2 interface (on-board), you'll be able to enjoy the performance and features of the MSMDHU14 receiver plus touchscreen control over key factory audio features, vehicle performance and diagnostic data.

DSP

Your bike and music are as unique as you are. With a Diamond Audio in-dash receiver, sound quality features like a 13-Band Graphic Equalizer with touch panel swipe settings and built-in high/low pass crossover with adjustable points and slopes provide you with the controls to tailor the listening experience to your vehicle and listening preferences.
