

HydroFLOW® *k40*

CHEMICAL-FREE TREATMENT FOR DOMESTIC SWIMMING POOLS AND SPAS

AQUAKLEAR

HYDROPATH Technology | The home of *HydroFLOW*®

k40 AQUAKLEAR

The HydroFLOW k40 Aquaklear is designed to improve the water quality of pools, hot tubs and spas, and also ponds and other water features.

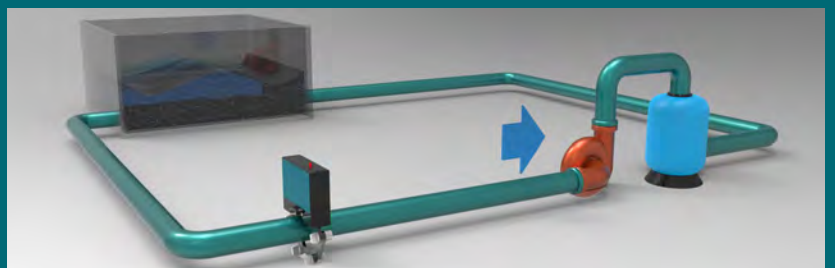

Reducing bacterial levels and improving filtration in pools, spas and ponds leads to clearer and more pleasant water, a reduction in maintenance regimes and a reduction in backwash, making the them both more pleasant to use and cheaper to run.

The HydroFLOW k40 Aquaklear has a range of benefits designed to make your system cheaper and easier to maintain, and more pleasant to use. The k40 is designed to reduce bacteria levels, to reduce hazardous chlorine use (and its unpleasant smell), and to help improve filtration for lower turbidity and reduced backwash.

The k40 fits easily around existing pipework, generally on the inlet to the pump and before the filter. The unit can be fitted around pipes of up to 63mm diameter and of any material with no plumbing required.

SPECIFICATIONS

- Signal monitor light
- PSU: Input 110-240V AC
- Unit: Input 12V AC/DC
- Max power: 1.2 W
- Weight approx: 300grams
- Dimensions: H 152 x W 118 x D45mm
- Maximum pipe diameter 63mm OD
- Lead length 3m

FROM COMBI BOILERS TO COOLING TOWERS

HydroFLOW units are working all over the world on multiple applications, treating carbonate and non-carbonate scaling and filtration issues in a wide variety of industries. Check out our website for more information.

- From homes to heavy industry
- From spas to steel mills
- Suitable for any pipe material
- From 15mm to 1500+mm OD pipe diameter
