

# HydroStream

*A New Way To Go!*

## What You Should Know About

*HydroStream*

**The Company** — *HydroStream* is a growing member of W. E. Pipkorn Industries, a family-held corporation with an old world German heritage based on craftsmanship and quality. At *HydroStream*, it is our purpose to provide the buyer with the most innovative engineering and the finest materials available, assembled by people chosen because of their quality skills. Our phenomenal growth in recent years is testimony to public acceptance of this theory of operation.

**The Designer** — *Howard Pipkorn*, educated as a mechanical engineer, has accumulated a host of credentials in the marine industry. These include a variety of national records, three National Championships, and induction into the American Power Boat Association's "Hall of Champions". His use of concave and hyperbolic skin surfaces has resulted in designs producing performance and speed superior to comparably-sized craft.

**Research** — We at *HydroStream* are not content to attach a flashy-looking deck to a mediocre-performing hull. We have found that a combination of racing experience and on-the-water testing has been the key to attaining a position of leadership in the performance boat field. A major portion of our budget is allocated to research and development — assuring you of the very latest in hydro-technology.

# VIPER

*For years the Viper has been the most popular HydroStream model. The Viper uses an airfoil principle and the lifting action of the water. Because this combined lift achieves maximum affect at the transom, it results in instantaneous throttle response.*

*This year we offer a special addition to the Viper line. We call it Coco Loco. It sports a color-keyed interior and orange accent stripe to compliment the Coco fire-glass finish.*

- Length 15' — 457 cm
- Beam 86" — 219 cm
- Transom Height 21¾" — 55 cm
- Coast Guard Approved Power
- Range 50-120 HP

# VENTURA II

*A refinement of the original Ventura, (HydroStream's first V Hull) the two Venturas have racked up an incredible string of victories, championships, and records. The Ventura is a super ski boat with thrilling handling characteristics. Runs like a 115 h.p. with your 85 h.p. motor.*

Length 16½' — 500 cm

Beam 84" — 213 cm

Transom Height 22" — 56 cm

Coast Guard Approved Power

Range 50-140 HP

# VECTOR

*The Vector is the pride of the HydroStream fleet and a real standout in the 100 plus horsepower outboard class. If you're looking for total performance, the Vector is way out front.*

Length 17' 1" — 521 cm

Beam 89" — 226 cm

Transom Height 23" — 58 cm

Coast Guard Approved Power

Range 60-165 HP

# VULTURE

*The Vulture is our answer to today's super power outboards. Every clean, graceful line and curve is a highly functional component of air and water streamlining. Its new gull-wing hull produces a driving responsiveness that will make you agree that the Vulture is Big on comfort, Big on ride, and Big on performance.*

Length 20' — 610 cm

Beam 89" — 266 cm

Transom Height 21" — 53 cm

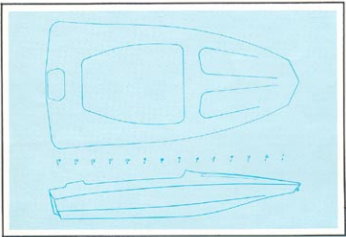

Power Range 100-250 HP

# VANDAL

*HydroStream presents a break-through for the budget performance boat buyer.*

*Our new gull-wing hull and a rescaled Ventura deck team up to produce a well-balanced super performer at an astonishing price. The Vandal offers big-boat performance at a small-boat price.*

Length 14½' — 445

Beam 73" — 185 cm

Transom Height 21½" — 55 cm

Coast Guard Approved Power

Range 20-85 HP

*Too New  
 To Make The  
 First Edition of our  
 '77 Catalog!*

# VARMINT

Whether you're heading for a bass tournament or towing a skier, HydroStream has created another top performer. Fresh new styling plus these precision-engineered utility features: dual live wells, rod storage locker, spacious front storage compartments with room for batteries, molded steering console, moveable seats, and front and rear fishing platforms. Take the Varmint out angling and no one will beat you to the hot spots.

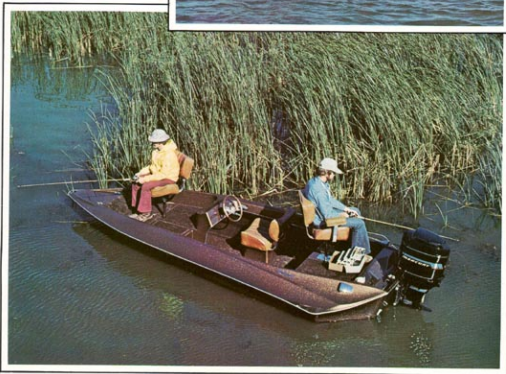

Length 17'1" — 521 cm

Beam 88" — 223 cm

Transom Height 21" — 53 cm

Coast Guard Approved Power

Range 60-165 HP

Length 16½' — 500 cm

Beam 84" — 213 cm

Transom Height 20½" — 52 cm

Coast Guard Approved Power

Range 50-140 HP

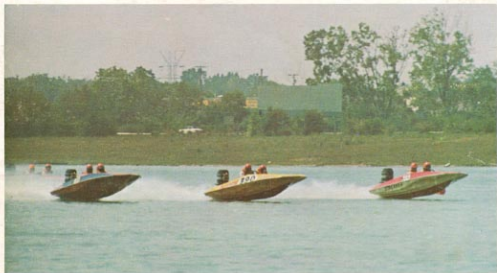

# VAMP

16

*At first glance, the Vamp may appear to be just another tastefully-styled bowrider. Closer inspection reveals a refreshing new layout with chaise lounge front seating for ultimate passenger comfort and a wide stance deep "V" hull (rather than cathedral) to give you a faster, smoother, drier ride without sacrificing stability.*

# We Race - - - You Win

*The sustained torture of racing is the ultimate test of a boat's construction and design. That's why new materials and construction methods are first tested by our racing team. Ideas that make the grade on the race course are then lake-tested by our research and development teams to determine their merit for production models. We have found this method produces highly efficient hulls which are ideally suited for pleasure use. They are characteristically faster and can carry more weight and operate more economically at a given speed.*

*That's why when we race - - - you win.*

#### WARRANTY TO ORIGINAL PURCHASER

HydroStream warrants its new production hulls to be free from defects in materials and workmanship under normal use for the period of one year from the date of delivery by an authorized HydroStream dealer. All repairs will be made by HydroStream. Transportation expenses shall be paid by the owner.

This warranty does not apply to gelcoat, windshields, carpeting, upholstery or hardware supplied by other manufacturers. All repairs shall be subject to the authorization of factory trained HydroStream personnel. Those decisions shall be final.

This warranty supersedes any other guarantee either expressed or implied.

In order that we may continue our policy of constant product improvement HydroStream reserves the right to change specifications and prices without notice.

SEE YOUR LOCAL HYDROSTREAM DEALER:

The HydroStream logo is written in a stylized, cursive script. The word 'Hydro' is in a light pink color, and 'Stream' is in a darker pink color. The 'S' in 'Stream' is particularly large and loops around the 't'.
