Hydr Stream

In an effort to achieve a high measure of performance, many manufacturers have attempted to duplicate the designs of Howard Pipkorn - yet - HYDROSTREAM HAS NO EOUAL!!!

Since the development of his first V-Hull in 1969, Pipkorn has added new models on an annual basis. All prototypes of new models undergo hundreds of hours of developing, testing, proving, correcting and retesting, Because the sustained high speeds of racing provide the supreme test for stability, physical structure, cornering ability and other facets of design, the final test of all Pipkorn boats is racing and the records point out again and again the suprements of the design of the design of the suprements of the design of the

superiority of riyurostream.

However, superiority is not attained by design alone. Craftsmanship and quality construction materials are a necessity. Extensive and effective use of concave surfaces, skin-stress design, an inseparable bonding of deck and hull, are only a portion of the inherent positive factors of HydroStream.

HydroStream is continually researching and testing new concepts and materials to achieve a higher degree of performance and styling. Research has been directly responsible for the new engery efficient bottom designs that require less power to attain a given speed.

It is our purpose at HydroStream to provide the buyer with the most innovative engineering and materials available to achieve a performance and styling unique to itself. Every component of style is an active additive to performance. HydroStream's phenomenal growth is testimony to acceptance of this theory of quality operation.

FOR THE RECORD.... In 1973, HydroStream Venturas won the U.S. National Closed Course Championship, the U.S. National Martano Championship and set the 1 hour, 2 hour, and flying kilometer speed records for the FS class. This touched off a wave of HydroStream victories, championships and record breaking performances. Today, HydroStream holds the straightaway record for ALL of the popular production OPC classes... D. E.G. J. and FS.

1977 World Racing Champion, Howard Pipkorn, member of the American Power Boating Association "Hall of Champions", and several times National Champion, uses his racing experience coupled with engineering skills to design HydroStream products. His winning record is positive documentation of HydroStream's performance and endurance.

VANDAL 14'

The Vandal, new in 1977, added an excellent model to an already prestigious line. This sleek little sportabout delivers a spirited performance. The gull wing design gives the illusion of flying.

FEATURES:

Smoke tinted, split windshield Tuck away instrument panel Left side niche

HydroStream is designed and built for total performance. Speed, handling, ride, exceleration, manueverability this is total performance this is Vandal.

Length 14½' · 445 cm Beam 73" · 185 cm Transom Height 21½" · 55 cm Power Range 20 · 90HP

VARMINT 17'

What a Bass Boat gets you there with More! The Varmint combines engineering, ingeniering, ingeniering, ingeniering, ingeniering, ingeniering, ingeniering, ingeniering, ingeniering, ingeniering, such standard HydroStream equipment as Ride-Guide mechanical steering for handling in the curves and on the straightaways, fore and aft running lights and dual ski tows providing for a full current of pleasure.

FEATURES: Dual live wells

- Spacious dry storage compartments
- Rod storage locker
- Two adjustable, swivel fishing seats and drivers seat
- V-Hull provides a smoother ride at any speed Optional Dare Devil - Red metal flake highlighted in silver with matching interior

WHEN THE FISH QUIT BITING - GO SKIING

Length 17'1" - 521 cm Beam 88" - 223 cm
Transom Height 21" - 53 cm Power Range 60 - 165HP

VECTOR 17'

In the tradition of HydroStream, Vector offers the owner a craft of virtual perfection. Continual refinement of its hydrodynamic design has resulted in a boat embodying not only superlative speed and handling, but also the performance you've been looking for in a water ski rig. In whaterery you call fun, you'll find Vector.

FEATURES:

Delta wing design

Hyperbolic windshield High-back bucket seats

Optional Boss Moss with green and gold metal flake and coordinated interior

HydroStream's Vector received the highest speed rating by motor manufacturers when used in comprehensive testing programs for a given horsepower.

Length 17'1" - 521 cm Transom Height 23" - 58 cm Beam 89" - 226 cm Power Range 60 - 155HP

VAMP 16'

For the sun god and goddess the Vamp provides comfort, speed and beauty unsurpassed by other Bowriders. Its deep V-Hull knifes through the water assuring a smooth, dry ride for those relaxing in the forward body contoured recliners, as well as for those basking in the aft fold down lounges.

FEATURES:

Wide stance V-Hull for superlative turning, handling and

Back to back bucket seats open into sun lounges Forward body contoured recliners

Swept, walk through, windshield

Low profile bow rail Forward companionway provides easy access and egress

SPECIAL EDITION - Coco-Loco - Coco metal flake with accent stripe and coordinated interior.

Length 16%' - 500 cm Beam 84" - 213 cm Transom Height 201/2" - 52 cm

Power Range 50 -140HP

VENTURA 16'

In 1974, Ventura set an FD straightaway record with a box stock 50hp motor. HydroStream's energy efficient model runs like a 115 with your 85. Every component of its style is an active additive to Ventura's performance.

FEATURES:

Airfoil design Sculptured concave surfaces to decrease weight and increase

Flared bow maintains a dry interior

Custom contoured, high-back, bucket seats

Molded (integral chine) turning spoilers

SPECIAL EDITION - Autum Mist Ventura with its three

SPECIAL EDITION - Autum Mist Ventura with its three metal flake earth tones blended for a stunning, iridescent finish plus color accented interior and "New" hyperbolic, smoke tinted, frameless windshield, puts you out front!!!

Length 16½' - 500 cm Transom Height 22" - 56 cm Beam 84" - 213 cm Power Range 50 - 140HP

VIKING 18'

This new 18 footer built to accomodate up to a 175/V6 engine, has been well received by motor manufacutrers in their testing programs. Its handling and cornering capabilities, resulting from the gull wing hull design, are only surpassed by its straightaway performance.

FEATURES:

Pointed droop-snout bow

Delta flair tail Swept in, hyperbolic windshield

Intensive use of sculptured concave surfaces to reduce weight and increase strength

SPECIAL EDITION - Blue Streak - Silver body accented with blue flake.

Beam 89" - 226 cm Length 17'9" - 541 cm Transom Height 22%" - 57 cm

Power Range 85 - 175HP

VIPER 15'

The Delta wing design converts forward motion into lift allowing the Viper to all but fly over the surface of the water. Like its namesake - it strikes and moves out before you know it - the ultra responsive Viper.

FEATURES:

Delta V racing hull

Skin-stress design allows less weight, more styling, better performance

Ride-Guide mechanical steering High-back contoured bucket seats

Stainless and woodgrain steering wheel

SPECIAL EDITION - Silver Streak - Silver flake body with faded red highlight through the shear line - coordinated interior.

Length 15' - 457 cm Transom Height 21%" - 55 cm Beam 86" - 219 cm Power Range 50 - 120HP

WARRANTY TO ORIGINAL PURCHASER

HydroStream warrants its new production hulls to be free from defects in materials and workmanship under normal use for the period of one year from the date of delivery by an authorized HydroStream dealer. All repairs will be made by HydroStream. Transportation expenses shall be paid by the owner.

This warranty does not apply to gelcote, windshields, carpeting, upholstery or hardware supplied by other manufacturers. All repairs shall be subject to the authorization of factory trained HydroStream personnel. Those decisions shall be final.

This warranty supercedes any other guarantee either expressed or implied.

In order that we may continue our policy of constant product improvement HydroStream reserves the right to change specifications and prices without notice.
