# HydroStream

It is our purpose at HydroStream to provide the buyer with the most innovative engineering available to achieve a performance and styling unique to itself. The elements of HydroStream design are more than style, they are additions to performance. Intensive use of sculptured skinstressed surfaces reduce weight and increase strength. Superiority, however, is not attained by design alone. Craftsmanship and quality construction materials are a necessity. All prototypes of our models and materials undergo many hours of developing, testing, proving, correcting and retesting. HydroStream is continually researching and testing new concepts and materials to achieve a higher degree of performance and styling.

1977 World Racing Champion, Howard Pipkorn, member of the American Power Boat Association "Hall of Champions", and several time National Champion, uses his racing experience coupled with engineering skills to design HydroStream products. His winning record is positive documentation of HydroStream performance and endurance.

#### NOTE:

In some instances, photographs in this catalog show experienced drivers operating HydroStream boats in an extreme manner with special equipment and under optimum conditions. HydroStream does not recommend such use of its products by the inexperienced driver under any circumstances or by the average or experienced driver without special equipment and/or under less than optimum conditions. We at HydroStream continually stress safety and recommend the use of life preservers and other safety equipment during all boating activities. Further, we encourage all drivers to exercise such prudence and caution in the operation of any boat warranted by their level of experience and the conditions present at the time.

Competition boats are expressly excluded from coverage under this Limited Warranty and are not warranted by HydroStream under any circumstances.

HydroStream agrees to repair or replace any defective production hull without cost to the original purchaser. No repairs shall be made without the prior consent and approval of HydroStream personnel. Any transportation, de-rigging or re-rigging costs shall be paid by the original purchaser.
