

**NFPA 1851 COMPLIANT**

IT'S SIMPLE...  
THE CLEANER YOUR PPE... THE SAFER YOUR PPE.

*Don't risk personal injury - keep your protective Kevlar gear clean*

# CITROSQUEEZE®

## FR COVERALL AND PPE APPAREL CLEANER

Preserve the protective quality of your gear with CitroSqueeze®, the PPE gear cleaner used by many of the largest US fire departments, and the recommended PPE & gear cleaner of the US Forest Service.

### KEVLAR® PPE CLEANING

■ Loggers' chaps, fallers' pants and other kevlar-enhanced gear protect from chainsaw injuries, as well as provide additional features such as visibility and FR protection when needed. However, they only provide the protection and visibility you need if they are kept clean of oil and other contaminants common in the workplace. But cleaning your gear with household detergents or industrial cleaners can seriously degrade the protective qualities of your Kevlar® or FR gear. **The solution is CitroSqueeze PPE Cleaner.**

■ CitroSqueeze® helps maintain the protective quality of your PPE apparel. It is **the PPE cleaner tested and proven safe** by Dupont, Southern Mills, W.L. Gore & Assocs. (Germany), 3M Products, Safety Components International, Inc., and CIBA Specialty Chemicals\*.
