

**EZ**  
COVER  
**PERGOLA**

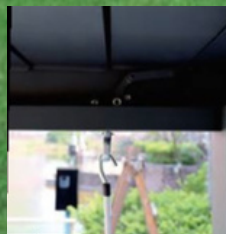

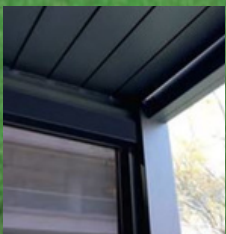

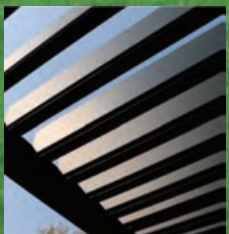

# FEATURES

- 40% Thicker Aluminium
- Super Reinforced Solid Frame
- Double Weight-bearing Capacity
- Complete Water-draining System
- No Water-leakage
- Strip LED Lighting

Numerous outdoor structures, including patios and decking, can transform your backyard area into an oasis. Among these structures, the pergola stands out as a popular option. With customisable features and specifications, **choose the EZ Cover™ Pergola**. The EZ Cover™ pergola remote controlled tilting double-layer louvres allow you to switch between a closed, sheltered space or open louvres allowing sunshine to brighten your space. Use your outdoor area even when the weather is less than perfect. Add the optional side screens or glazed doors for even high degree of weather proofing.

# ROLLER BLINDS

Protect your outdoor privacy by fitting Roller Blinds to your EZ Cover™ Pergola. With **multiple colour options** to choose from, you can customise the Roller Blind to conceal your outdoor space or blend in with the decor of your garden. The fabric is **made from Polyester and PVC**, which provides durability in bad weather and protection against harsh UV rays. With the **electric remote control system** you are able to open and close your Roller Blind at the touch of a button.

## Fabric Colour Options (Transparency 5%-30%)

# GLASS PANELS

Glass sliding panels are a great way to enhance the elegance of your EZ Cover™ Pergola..

Each panel is constructed from **10mm of tempered safety glass**, guaranteeing not only an unobstructed view of your garden but also providing robust protection and peace of mind. The tempered glass ensures durability and resilience, making it an ideal choice for a wide range of weather conditions and environmental factors.

The **ability to fully lock** these panels not only enhances security but also adds convenience to your pergola.

Door Lock

Anti-Collision Fittings

Water Proof Barrier

- Fully Stainless Steel
- SGS/GS/CE approved for safety
- Gentle heat diffused glass-ceramics
- IPX25 Waterproof Rating

RRP:  
£372 Inc. VAT.

# ADDITIONAL INFORMATION

**Planning permission** - In most cases, you do not need planning permission to add a EZ Cover™ pergola to your garden. However, there are some regulations you will need to be aware of:

If the pergola is built within 2m of your property boundary, your pergola can't be more than 2.5m tall. You will need planning permission if your home is in a conservation area or is a listed building or, if more than half of the land around your "original house" is already covered by garden buildings.

If you are unsure, it is advisable to contact your local Planning Office.

**Base** - The EZ Cover™ Pergola will require a concrete base. It is important that the base is flat and level, it will need to be of sufficient strength to bolt each of the corner posts of the EZ Cover™ Pergola down.

**Power Requirement** - 220V Single phase 10 AMP supply

**DIY installation** - The EZ Cover™ Pergola will require assembly and we recommend this is carried out by our nationwide installers. Alternatively, if you feel confident to complete the installation yourself, we suggest 2-3 people are required to safely lift and assemble the pergola. The build time is approx. from 4 hours (subject to order specification). In order to secure the pergola to the ground, expansion bolts are supplied as standard.
