Even faster results can be achieved with 400 mg Deca 300 per week and 500 mg Sustanon per week. Athletes report an enormous gain in strength and muscle mass when taking 400 mg Deca 300 per week, 500 mg Sustanon per week, and 30 mg Dianabol per day. Deca 300 is a good basicsteroid which, for muscle buildup, can be combined with many other steroids. Deca is used stacked with Dianabol and Sustanon 250. The Deca injection is normally taken once a week on a stand-alone cycle or in a steroid stack. The dosage of Deca-Durabolin. The dose of Deca depends on many factors and what you want to achieve. In general, you should take between 200 and 600 mg of nandrolone decanoate once a week.

Buy Deca Durabolin in the USA. Deca Durabolin is a very famous injectable anabolic steroid which contains the steroidal hormone Nandrolone and is joined to the enormous Decanoate ester. The Nandrolone hormone initially showed up in 1960 under the exchange name Deca Durabolin. 400-500mg per week. 12. 300-400mg per week. 400-500mg per week. More advanced steroid users can run a steroid cycle of Deca-Durabolin (with Testosterone as a base) at a dosage of up to 600mg per week. Typically, the cycle will run for twelve weeks.

There are other Deca cycles that you can try out if you want. These are mostly for bulking though.

Enanthate and Deca Cycle This cycle is 19 weeks long, with the following progression: From weeks 1-12, you take 500mg of Enanthate and 400 Mg of Deca daily. From week 12-14, you go off the steroids and initiate Post Cycle therapy for weeks 16-19. Off-Season Deca Durabolin Doses: Off-season Deca Durabolin doses will normally fall in the 300-400mg per week range. Due to the steroid's long half-life one injection per week could get the job done. However, most will find two small equal size injections per week that total the desired weekly dose to be most efficient.

So I am debating on how I'm going to do this cycle I have test 250mg 20ml and deca 300 mg 20 ml I was thinking of doing 500 mg of test and 600 mg of deca a week and not upping or lowering the doses. I know it is best to use a little more test then deca but don't think it's a big enough diff I'm 28 years old 5'11 and 208 pounds I have been working out for 7 years now and this is my second cycle.

Re: Deca or Primo at older age. There's a lot of guys more sensitive to Deca dick. Can't get it up for 6-10 weeks. Probably worse in their 50s. That's true, if you have an existing condition, it's going to make it worse. Just like if you have high BP and then start taking AAS, you are going to have problems.
