MOTARASU
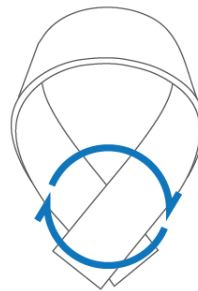

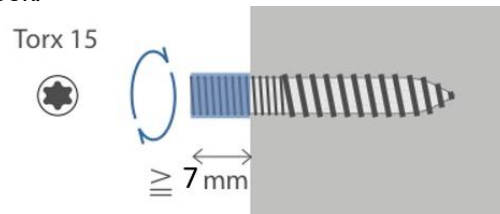

RIBBON is a hook or coat hanger, made by bending wood. You can hang jackets, hats, scarves, towels among other things, from it.

RIBBON is handmade and the technique gives variances in shape making each piece unique. It comes in three versions: beech / walnut / black stained beech.

Mount the screw max 7 mm from the wall. Remove the black scotch tape. Screw the **RIBBON** in place. If the **RIBBON** is not completely vertical, you can adjust the screw.

WARNING!!: the screw must not stick out more than 7 mm from the wall. If longer than 7 mm it will break the hook.

Torx 15

$\geqq$ 7 mm
