SAFES & SECURITY SOLUTIONS

SAFE TERMINOLOGY

Here is some of the most common terminology for safes and security systems. In addition to terminology for standard safes, we have also included terminology specific to our biometric fingerprint scanner technology. This information will help you understand each safe's features and specifications. Barska uses standard safe terminology in specifications to make choosing a safe a quicker and simple process.

BIOMETRIC SCANNING IMAGE SENSOR

The Biometric safe fingerprint image sensor uses an optical sensor to create a bio algorithm (encrypted mathematical key) of your fingerprint and stores this to memory to access the safe. The Biometric sensor uses advanced industry leading algorithm-mapping technology to read your fingerprint to unlock the safe.

BIOMETRIC USER MEMORY

Biometric safes store fingerprints recognition to internal memory storage. Note that these are mathematical keys and not the actual image of a fingerprint. All Barska biometric safes allow multiple users to be saved in memory. It is also recommended to scan and store multiple fingers in to the safes memory in case of extreme injury to a finger.

USER FINGERPRINT REGISTRATION

A new Barska Safe is in demo mode, which allows any fingerprint to open the safe. You will need to register a user fingerprint to lock the safe. Simply press and release the registration button on the inside of the safe, then place your finger on the scanner so that the optical sensor can scan your fingerprint. You will hear a confirmation beep when successful.

CALIFORNIA DEPARTMENT OF JUSTICE APPROVED

Select safe models have been tested and approved by the California DOJ as a firearm secure storage device. The California DOJ testing procedure is the strictest in the country and qualifies for all 50 state guidelines.

DEADBOLT SYSTEM

Select safe models feature motorized dead bolts. These are the thick steel bolts seen protruding from a safe's door. When the safe is locked the bolts slide into position behind the door jamb, anchoring the door firmly shut. Motorized deadbolts secure the locking system preventing any tampering that may cause locking solenoids to fail. Non-motorized deadbolt safes use less power and feature a longer battery life.

MOUNTING

Select safe models feature pre-drilled mounting points on the bottom and at the back of the safe. The included lag-bolts allow you to securely attach your safe to a fixed structure. For added security, it is recommended that safes be secured to a solid structure to prevent the safe from being knocked over or from being carried away.

BATTERY LIFE

Select safes are powered by standard AA batteries and can last up to 2 years with normal use. Non-motorized deadbolt safes use less power and feature a longer battery life. If the batteries have lost their charge the safe can still be opened via the mechanical back-up key or by using a temporary power bypass that connects externally to the safe.

SECONDARY BACK-UP KEY ACCESS

Select safes feature a secondary back-up mechanical key access. The access point is normally hidden. All Barska Safes come with a set of back-up keys.

OUTER DIMENSIONS

Depth - Describes the depth of the safe, from front to back, as measured on the outside.

Width - Describes width of the front of the safe, from outside edge to outside edge.

Height - Describes the height of the safe, from top to bottom, as measured on the outside.

SAFE ONE YEAR LIMITED WARRANTY

(Within USA and Canada only)

This warranty does not cover consumer-caused damages, abuse, normal wear-and-tear, unauthorized repairs or modifications. For further detailed information, please refer to the warranty policy enclosed with products. Select models.

BARSKA SAFES

Barska biometric safes are the ultimate in quick access security solutions for the home and office. Secure and access your valuables in seconds with the simple scan of a fingerprint. With Barska biometric safe you will no longer have to waste time looking for your keys or entering a combination, to access your safe all you need is your fingerprint. Barska biometric fingerprint scanners are the highest resolution and most advanced in the safe industry. In addition biometric safes, Barska also offers a wide range of safes with a variety of access mechanisms, sizes, and features. Barska also manufactures a wide selection of basic secure lock boxes such as cash boxes, multi key storage safes, compact combination safes, diversion safes and digital keypad safes.

Biometric Wall Safe

There is no need to search for keys, or remember a complicated pin code to open this safe, just place your finger on the fingerprint scanner to unlock this safe. Designed to house important items such as personal valuables and every day medical supplies. Inside the safe is an additional locked compartment for more sensitive items. To find items faster a convenient LED light is built into the safe for illumination. A manual fold down shelf provides a stable, work surface area and/or writing area.

**0.83 Cubic Ft
Beige Biometric Wall Safe
AX12408**

**0.83 Cubic Ft
Beige Biometric Wall Safe,
Left Opening
AX12880**

Features

- Fingerprint Memory Can Store Up To 120 Users
- Two Solid Steel Motorized Locking Bolts
- Pre-Drilled Mounting Holes
- Operates On 6-AA Batteries (Included)
- Interior Locking Compartment
- Interior Led Light
- Fold Out Tray

Includes

- Removable Shelf
- Protective Floor Mat
- Plastic Separator
- Mounting Hardware
- 2 Back-Up Keys For Safe
- 2 Keys For Interior Compartment

Contents Not Included

Biometric Wall Safe

The hardest safe to break into is the one that no one knows is there! The perfect hidden safe for any home or business that can easily be concealed behind pictures, mirrors or behind furniture. With the main body of the safe inside the wall the door allows it to sit flush against the wall, providing concealment. An emergency override key enables you to open the safe even without entering the combination. Two removable shelves to organize valuable items such as medicines, jewelry and important documents.

**0.52 Cubic Ft White
