

Founded in 1996 in Wilmington,

North Carolina, Orbita now is the leading

producer and provider of premium watch

winders in the world.

While Orbita did not invent the mechanical exercising of watches, the company did introduce a new, unprecedented level of quality. We began our endeavor by learning everything we could about mechanical watches, and then we researched the gentlest way to wind them. From inception, Orbita's company philosophy has been to create products of lasting value and exceptional attention to detail; products that people enjoy owning because they work perfectly and are pleasing to the eye.

At Orbita, we pride ourselves on proprietary developments, creating leading edge winding technology based on fresh ideas, innovative systems and superior components. Our drives, gears and controls are meticulously designed and fine tuned for the precise needs of every watch movement produced today.

Additionally, we carefully select only the finest, timeless materials for our products, including handcrafted and detailed marquetry, the best grades of leather, sophisticated multi-layered lacquering, and the most modern carbon fibers.

We are honored to have earned the confidence of timepiece collectors and premium watch manufacturers throughout the world, and pledge to uphold those standards that earned your respect. We sincerely hope you enjoy your Orbita watch winder, in whatever time zone you call home.

Advanced Winding Technology, For Your Lifestyle.

Mechanical watches require winding motions that are tailored to their specific construction in order to wind them in a gentle and safe manner. Orbita offers two made-in-the-USA, patented movements to accomplish that task. Both movements feature ball-bearing construction and solid-state controls to insure a long and maintenance-free life.

ROTORWIND® MOVEMENT

PROGRAMMABLE MOVEMENT

Lhe Carolo™ watchwinder

is based on a unique carousel design that is both attractive and functional. The hexagonal case is mounted on a low profile heavy duty ball-bearing swivel which can be effortlessly rotated by hand providing access to each of the six watches. It is the perfect winder for use where space is limited.

Housed within the hexagon case are six longlife Lithium batteries. The case is fabricated with carbon fiber panels and elegant, highgloss black lacquer finish. The CAROLO $^{\scriptscriptstyle{\text{M}}}$ watchwinders can be stacked one above the other on the base unit, building up to four levels for a total of twenty-four individually powered winders.
