ENROLL

DELETE

Key hole   Start button   Battery cover

1) Locate the supplied keys from the packaging and set the safe on a flat surface.

2) Insert the key into the lock and turn the key clockwise (to the right) until you hear a click (about a quarter turn). (*See Figure 1*)

3) Remove the key by turning it counter-clockwise (to the left).

4) Once the key is removed, you may lift the lid completely open.

5) The battery compartment is located inside the safe on the right. Gently slide the cover up and remove it from the interior.
      (See Figure 2 on page 5)

6) Pull on the ribbon to remove the battery holder. Insert four (4) AA **alkaline** batteries with a "use date" of at least five (5) years in the future. Be mindful of the battery orientation.

   (Recommended battery brands: Duracell™, Energizer™, Eveready™)

7) Insert the battery holder into the battery compartment.
8) Re-install the battery cover and slide it closed.

FINGERPRINT REGISTRATION

!!!!!! WARNING !!!!!!
If you do not register any fingerprints then the safe will open if the "Start" button is pressed.

MAKE SURE YOU REGISTER
AT LEAST ONE (1) FINGERPRINT.

There are TWO (2) types of fingerprint registrations:

1) "Administrator" Fingerprints
2) "User" Fingerprints

The first TWO (2) fingerprints registered are "Administrator" fingerprints. These "Administrator" fingerprints are required prior to enrolling each "User" fingerprint. "User" fingerprints cannot enroll more "User" fingerprints.

In order to register "User" fingerprints, an "Administrator's" fingerprint must first be entered.

READ THIS PROCESS COMPLETELY BEFORE STARTING

1) Press and release the "ENROLL" button located on the inside of the safe. You will hear ONE (1) beep and the LED light will begin to flash green. The sensor will light up as well. (*See Figure 3*)

2) Place your finger on the sensor and HOLD for over TWO (2) seconds. You will hear ONE (1) beep and then another ONE (1) beep and finally TWO (2) quick beeps. The LED light will flash green for a successful enrollment. The LED light will flash red for a failed enrollment.

NOTE: For better enrollment success, once you place your finger on the sensor, DO NOT MOVE, DO NOT ROTATE, DO NOT SHAKE, DO NOT SLIDE, and DO NOT TWIST your finger. Keep it as steady as possible until the LED light turns off.

3) Repeat this process for setting your TWO(2) "Administrator" fingerprints. The "Administator" fingerprints must first be enrolled before "User" fingerprints can be enrolled.

See next page for enrolling "User" fingerprints.

Enrolling User Fingerprints
READ THIS PROCESS COMPLETELY BEFORE STARTING

1) Press and release the "ENROLL" button located on the inside of the safe. You will hear ONE (1) beep and the LED light will begin to flash green and the sensor will light up indicating the enrollment process has started.

2) Place one of the three registered **"Administrator"** fingers on the sensor. You will hear TWO (2) beeps indicating that a "User" fingerprint may now be enrolled.

3) Now place the **"User"** finger on the sensor and HOLD for over TWO (2) seconds. You will hear ONE (1) beep and then another ONE (1) beep and finally TWO (2) quick beeps. The LED light will flash green for a successful enrollment. The LED light will flash red for a failed enrollment.

NOTE: For better enrollment success, once you place your finger on the sensor, DO NOT MOVE, DO NOT ROTATE, DO NOT SHAKE, DO NOT SLIDE, DO NOT TWIST your finger. Keep it as steady as possible until the LED light turns off.

Repeat this process for up to ONE HUNDRED AND SEVENTEEN (117) "User" enrollments.

Opening the Safe after Setup

Press and release the start button. The LED light flashes green and beeps once.
Place and hold your finger on the sensor. The LED light will flash green two times and will hear two beeps. Then the unit will open.

Locking the Safe

1) Close the lid and press firmly on the lid. You will hear a "Click".

2) Check to make sure it is locked by lifting up on the lid.

TROUBLE ENROLLING FINGERPRINTS

IMPORTANT SUGGESTIONS:

For better enrollment success, once you place your finger on the sensor, DO NOT MOVE, DO NOT ROTATE, DO NOT SHAKE, DO NOT SLIDE, and DO NOT TWIST your finger. Keep it as steady as possible until the LED light turns off.

- Finger Location: Try registering multiple fingerprints with the same finger but register each at different angles on the sensor.
- Women & Children: If you are having trouble registering your index finger, try using your thumbs.
- Dry Fingers: Try breathing on your fingers before putting them on the scanner. The extra moisture sometimes helps with fingerprint recognition.
- Age: Fingerprints get thinner with age and sometimes certain fingerprints do not present enough unique "identifiers" that are required to enroll a user. This is the limiting factor of fingerprint recognition technology to date.

DELETING FINGERPRINTS

You cannot delete just a single fingerprint. ALL of the fingerprints enrolled will be deleted.

First, press and hold the "delete" button, then press and release the "start" button. ***Warning: If no fingerprints are enrolled, the safe will open to the press of the start button.***

SOUND ON/OFF

Turn Sound OFF: Press and hold the start button for FIVE (5) seconds.

Turn Sound ON: Press and hold the start button for FIVE (5) seconds.

CHANGING THE BATTERIES

Please refer to page 4: Opening your safe for the first time.

At least once a year, replace the four (4) AA alkaline batteries with batteries that have a "use date" of at least 5 years in the future. *(Recommended battery brands: Duracell™, Energizer™, Eveready™)*

SECURE YOUR SAFE:

Using the Security Cable: *(See Figure 4 below)*

1) Wrap the security cable around a secure object.
2) Run the end of cable through the loop end of the cable and pull tight.
3) Open the safe and place the end of the cable (not the loop) through the left side slot in the back of the safe.
4) Close the safe lid and lock the safe.
5) Check to make sure the cable is secured by pulling on the safe.

Press Down

Figure 5

ELASTIC STRAP:

To Remove the Strap:

Press down on the metal hoops near the side hooks then pull toward the center of the safe. Do this to both sides.
(See Figure 5 above)

To Install the Strap:

Hook one of the metal hoops under one of the side hooks. Then pull the other metal hoop to the other side hook and push it down and under the hook. Make sure to keep tension on the first hook.
