1. For any combination style lock, it is a good idea to set the combination before installing the safe. We recommend that the combination be set with the **DOOR OPEN** in order to test the lock combination effectively without locking yourself out.
2. Clear out the contents of the center console for now, including the factory mat at the bottom of the console.
3. Remove the padding from the bottom of the inside of the safe.
4. Set the safe into the center console.
5. Using your screwdriver or drill, place the **LOCK'ER DOWN PROVIDED** self-taping screws into their respective holes in the safe.
6. Tighten the screws, **DO NOT OVER TIGHTEN, THIS COULD DAMAGE THE CONSOLE.**
7. Re-insert the padding that was removed from the safe before installation.
8. Enjoy your purchase!
