

KIDS

DIY SPIN ART CRAFT

What you'll need...

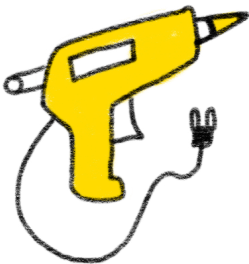

An old CD or plastic lid

A marble

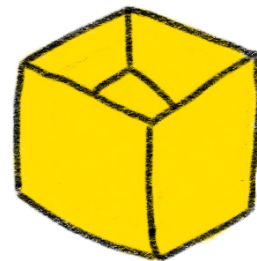

A bottle cap or marker cap

Hot glue

Paint

An old box or sheet

Step 1.

Create your child's spinner by hot gluing a marble on the bottom and a plastic cap on top (both in the center) of your disk.

Step 3.

Have your child pour paint on the spinner while it spins!

Step 2.

Find a place outside that can handle the mess. You can use an old sheet as a dropcloth or make your spin art inside a container, like a cardboard box.

Step 4.

They can take their works of centrifugal art and create a mobile, pennant, or suncatcher!
