

About Fridgy

Fridgy© is a family-owned Australian company that specialises in creating high-quality stainless steel water bottles and coffee cups. Our products are designed to withstand the toughest of Australian environments, including the harsh conditions in the North of Western Australia where we were founded and still operate today.

Our mission is to become the leading provider of reusable and eco-friendly products in Australia. We believe that we can achieve this by prioritising quality and using only the best raw materials. Our products not only look great, but they're also made to the highest standards with a stringent quality control process to match.

We take pride in our unique designs, which are Fridgy Patented, meaning they are exclusive to our brand. This sets us apart from competitors and ensures that our customers receive a one-of-a-kind product.

WHO ARE WE?

Fridgy© is a custom branded stainless steel vacuum sealed bottle and cup engraving company of the highest quality. Fridgy is designed to help companies and individuals elevate their brand with their staff and customers. We will engrave your company logo into the bottles or individual names. Just send us your vector file of your logo and we will send you a proof for approval.
