

AUTOMATIC SCRUBBERS - WALK-BEHIND

CT5

The CT5 is one of the smallest and lightest automatic scrubbers on the market and is extremely portable with its lightweight design weighing only 44 pounds, including the battery and brush. The machine can be carried from room-to-room, or transported on a cleaning cart such as the Brix, making it perfect for cleaning restrooms, picking up spills, and cleaning wet and slippery entryways. Its small, compact size allows it to squeeze into many tight spaces, such as aisles or between tables, making it perfect for the retail sector and restaurants as well.

CT5: THE PERFECT DAY PORTER FOR MAINTAINING THE APPEARANCE AND SAFETY OF A BUILDING

EASY TO USE

The CT5 is easy to use with its ergonomic and innovative control panel as well as its adjustable handlebar. It takes very little time to learn how to operate and a significant reduction in effort for having to move the machine from room to room.

EASY TO STORE

The CT5 has a maneuverable and compact design, weighing only 44 lbs. The machine can easily be stored, transported or parked into any space within seconds.

OPTIMAL RUN-TIME

The CT5's Lithium-Ion battery can be recharged within an hour, either on-board or externally, when swapping out batteries.

EASY TO FILL

The CT5's solution tank is extremely easy to fill: either directly or by removing the recovery tank from the machine. The easy to dump tank is easily removed and can be dumped into a toilet or sink.

EASY TO DRY

The CT5 can dry in both forward and reverse. This allows it to dry places that other scrubbers cannot reach, making it a perfect tool for restroom cleaning.

PRODUCTIVE

The CT5's battery guarantees 50 minutes of cleaning, or up to 75 minutes with an optional battery. It can clean approximately 6,500 square feet an hour.

SELF-LEVELING SYSTEM

The SLS helps the machine automatically adjust to any surface, allowing for a perfect fit between the brush and a floor.

REVERSE DRY SYSTEM

The cleaning power of the disc brush and perfect drying in every direction make the CT5 ideal for cleaning small and medium areas.

CENTRAL FLOW SYSTEM

The solution is distributed evenly through the brush' center.

ECO SELECT

Eco Select works to decrease energy consumption and increase run times by 20% in everyday cleaning.

YELLOW TOUCH POINTS

The yellow touch points help find key areas that assist with daily maintenance.
