

Sprayers

The IPC Eagle T6LTX24 and T6LTX50 heavy duty stainless steel sprayers are ready to tackle a complete range of different applications.

The sprayers are quickly charged and ready to be used. The sprayers are made of heavy gauge stainless steel, and come equipped with a coiled hose, stainless steel lance and nozzle, and a spray gun equipped with Viton seals. The sprayer's heavy duty construction allow them to be used with a wide range of caustic chemicals.

- Unit charges quickly, allowing you to be productive faster
- Ideal for spotting applications
- Heavy duty construction allows the unit to be used with a wide range of caustic chemicals
- Stainless steel construction allows for durability and heavy use
