# Sofidel Group

at a glance

With over 40 years of history (established in 1966), 28 production sites and 28 subsidiary companies in 13 countries (i.e., Italy, Spain, Sweden, UK, Belgium, France, Croatia, Germany, Poland, Romania, Greece, Turkey and USA), the Sofidel Group has more than 5,000 employees and an aggregate turnover of around \$2,022 million (2012).

It is the 6th largest manufacturer of tissue paper in the world (the 2nd largest in Europe). Its flagship brand “Regina” is present in all major markets.

Investment in the people and communities that we operate in, commitment to innovation and the quality of production processes, transparency and the adoption of responsible social and environmental actions – these are what the Group’s values are based on.

With sustainability programs driven by reduced CO2 emissions, tissue manufactured from 100% sustainable certified fiber and reduced water consumption in the manufacturing process makes Sofidel your sustainable partner for all your tissue and towel product needs.

Sofidel was the first company worldwide in the tissue paper sector to become a member of WWF’s International Climate Savers programme, which is based on the voluntary reduction of CO2 emissions through the adoption of innovative strategies and technologies.

Expect big things from Sofidel America as we help you grow your business with quality and innovative products.

## The Numbers that Make the Difference

### Even lower CO2 emissions

Sofidel's commitment to the WWF International Climate Savers programme aimed at reducing CO2 continued in 2012 the investments made in renewable energy, improvement in energy efficiency and cogeneration plants led to a 11.8% reduction in carbon intensity compared to 2007, which was perfectly in line with the commitments and objectives we set in 2008 (26% emission reduction by 2020).

### Improved responsible sourcing of cellulose

Sofidel constantly assesses and vets its suppliers to ensure that the pulp it uses does not come from illegal or controversial sources. Further improvements in this field were taken in 2011. In 2010, the amount of raw materials from certified sources or from sources complying with the main certification standards was 94.2%. for the Sofidel Group in Europe In 2011, this figure went up to 99.3% (42.6% FSC; 35.7% PEFC; 21% FSC-CW). In 2012 this figure went up to 99.8% (FSC; PEFC; FSC-CW). The remaining 0.2% is subject to alternative forest certification standards.

Sofidel America in 2012 sourced 100% of its cellulose fiber from certified sustainable sources.

### Encouraging results in reduced water consumption

The Group has long invested in management technologies and methods aimed at reducing its water consumption. The average amount of water used by the Sofidel Group in Europe in 2012 was 8.24 liters/kg (0.98 gal/lb) of paper produced, with some sites achieving even lower than 5 liters/kg. (0.60 gal/lb). The water consumption benchmark for the tissue industry is between 10 and 25 l/kg. (1.20 and 2.40 gal/lb).

Sofidel America's average consumption of water is 4.80 liters/ kg. (0.57 gal/lb) of paper produced.

# Heavenly<sup>®</sup> Soft

Heavenly Soft<sup>®</sup> offers a complete line of premium high-quality tissue and towel products equivalent to national brands.

# Heavenly<sup>®</sup> Choice Double Layer

### A Value Proposition:

Double Layer enables you to offer a superior product to your customers while realizing significant savings and creating added value.

### High-Quality Products

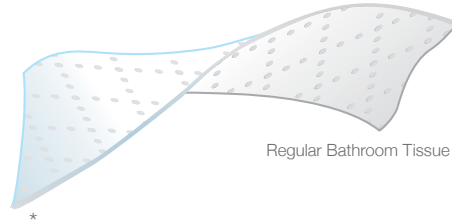

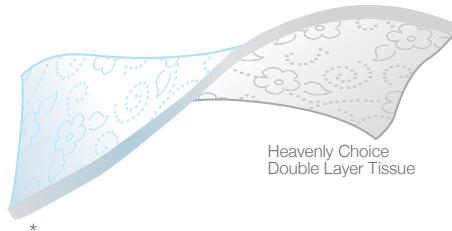

equivalent to national brands.

### Recycled Packaging:

All of our Heavenly Choice<sup>®</sup> packaging is made from 100% recycled materials.

### High-Capacity Rolls:

Products are sized with more sheets per roll and more content per case. When compared to traditional two-ply tissue, Heavenly Choice<sup>®</sup> Double Layer offers great performance by reducing the amount of roll changes and the labor costs.

Made from two plies fused into one, this innovative double layer tissue offers the luxurious look, strength and softness of a two-ply.

Get the look and feel of a two-ply with our Double Layer tissue and towel products.

### Environmentally-Friendly Product:

Double Layer takes less pulp, energy and water to produce than traditional two-ply tissue and towel products reducing the impact on the environment.

All Heavenly Choice<sup>®</sup> high-count tissue and towel products are an excellent choice to help you reduce waste since they require fewer cores, packaging and wrappers to be produced.

### Our Fiber:

Sofidel America's paper products use fibers that are 100% recycled or that originate from certified sustainable sources. Our paper products do not contain any added pigments, inks, dyes or fragrances.

### Processed Chlorine Free:

By using a chlorine free process our fibers are whitened without the use of any chlorine or chlorine derivatives.

#### Traditional 2 Ply Tissue

500 Sheets per Roll or less

#### Double Layer Tissue

700 Sheets per Roll - Offers 40% more paper per case

850 Sheets per Roll - Offers up to 70% more paper per case

\*Not actual size

# CONFIDENCE®

- Confidence is a premium line of high quality towel and tissue products, dispensed through a variety of controlled use and universal dispensers.
- Our unique TAD towel products are the best in their class. These versatile towels offer high performance hand drying and are ideal for any wiping tasks.

## Proprietary Dispenser Systems:

- High capacity Confidence no-touch controlled use dispensers encompass the latest innovations in portion control and consumption reduction.
- Confidence controlled use dispensers reduce costs by reducing usage and waste.
- With the Confidence no touch dispensers, the user touches only the towel that they need reducing the likely hood of cross contamination and the spread of viruses.
- With an attractive and stylish exterior, these controlled use dispensers complements every washroom design.

- Our Cellysoft® line offers a selection of quality tissue & towel products to help you compete in the market place.

Our premium high-quality products are designed for the most demanding environments.

## Jumbo Roll Tissue

High-capacity rolls, excellent for reducing labor costs in high-traffic areas • Soft, white, biodegradable and septic safe • More feet per roll, allowing for less frequent roll changes • Made with fiber from certified sustainable sources.

# A Credible Approach to Sustainability

A responsible approach to society and the environment means making use of a network of contacts and partners to share knowledge and experience and to develop effective actions together.

In 2008, Sofidel became the first Italian company and the first company in the tissue sector to join the WWF International Climate Savers programme. The project asks large companies to voluntarily adopt plans to reduce emissions of greenhouse gases, using innovative strategies and technologies that will allow them to take on the role of leaders in CO2 reduction. Our target is to reduce our direct emissions of carbon dioxide by 26% by 2020 compared to levels in 2007.

In February 2010, we joined the Fondazione Sodalitas, the first organization in Italy to be involved in promoting Corporate Social Responsibility and dialogue between enterprises and not-for-profit organizations.

At the end of 2010, Sofidel became a member of the United Nations Global Compact, a multi-stakeholder network that brings together governments, enterprises, UN agencies, trade unions and civil bodies with the aim of promoting the culture of corporate citizenship on a global scale and bringing about a new type of globalization.
