

Quick Start Guide VORTEX

1. Assembly

1
Insert the handle assembly into the handle bracket. Using the knob, star washer and flat washer, fasten the handle to the handle bracket.

2
Ensure the handle solution tank pin is toward the front of the unit and the cord wrap hooks are towards the rear.

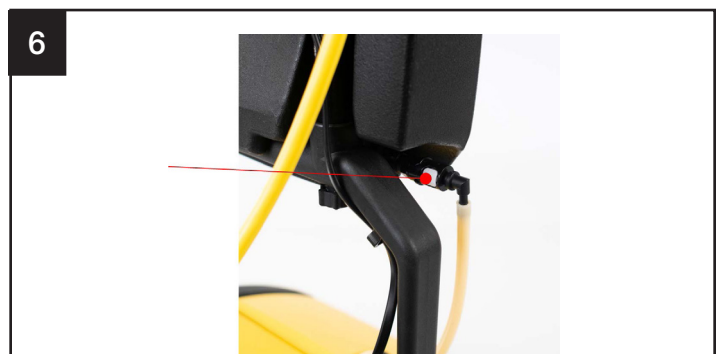

3
Feed the pump control cable through the (5) locations shown in the handle bracket and handle.

4
Plug the end of the pump control cable into the socket in the handle assembly.

5
Place the lip of the solution tank on the handle bracket and rotate it up so that the solution tank pin engages the solution tank pin retainer.

6
8. Attach the hose by pushing the elbow into the connection until it “clicks” and locks in.

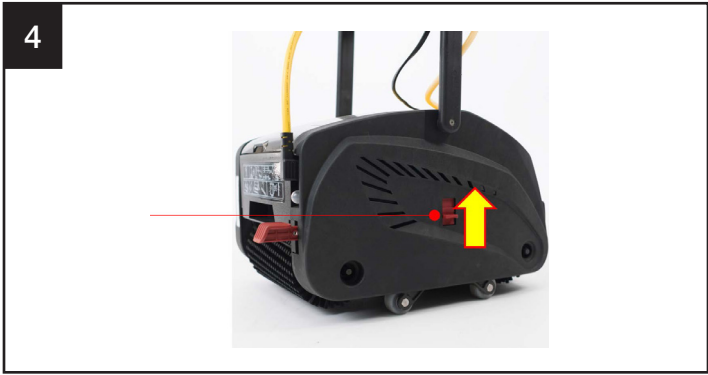

7
Push the shafts through the brushes from the side of the machine.

2. Operating Instructions

Verify that the brushes are fitted properly.

Move the Red slider on the right hand side of the unit to the working (UP) position

Set the brush pressure using the Red slider on the left hand side.

Start the machine by pressing the handle release pedal and pulling the handle back.

Fill fresh water tank with cleaning solution.

Move forward while sparingly pushing the solution control button.

3. Additional Parts Required

1. The purpose of these caps is to distinguish between different brushes when the machine is used in different area. This just helps the operator easily identify the brushes to avoid cross contamination.

2. Select the brushes from the table below that best suit your application.

TS050-W18-U

Brushes	P/N	Type of floor
Standard Brush	93216	Grouted Tile, Ceramic, Mosaic, Wood, Sports Floors, Rubber, Vinyl Tile
Soft Brush	93217	Marble, Granite, Slate
