

QUALITY SILICONE GASTRONORM LID

Designed to reduce the use and waste of plastic film wrap and foil on gastronorms and steam pans in commercial kitchens, the Flexsil-lid is an environmentally friendly, time-saving option for day-to-day preparation in food service establishments around the world. The reusable lid is primarily designed for keeping food items fresher longer in steam pans when stored in fridges or cool rooms, but has multiple uses, including cooking and freezing.

C	One-Third Pan Clear Lid	IT118626
D	One-Quarter Pan Clear Lid	IT118627
E	One-Sixth Pan Clear Lid	IT118628
F	One-Ninth Pan Clear Lid	IT118629

- **Effective:** Minimises food spoilage and waste, keeping ingredients fresher longer than using plastic film wrap
- **Versatile:** Can be used to cook (in ovens or microwaves), steam, refrigerate and freeze in any type of gastronorm, including stainless steel and ABS plastic
- **Safe and sturdy:** Sealed edges help transport food without fear of spillage while tactile silicone lids help keep containers from sliding in transit
- **Reusable:** Saves time and money by eliminating the need to consistently wrap containers and refill disposable wrapping material
- **Flexible:** Returns to its original shape after being stretched under normal use
- **Environmentally friendly:** Reduces the amount of harmful waste that is produced from using plastic wrap and foil
- **Easily labeled:** Works well with a variety of DayMark labels, including DissolveMark dissolving labels, MoveMark removable labels and DuraMark permanent labels.
