

phormulis™

# SKIN pH

## Why is it important?

Skin maintains its natural barrier at an optimal pH, which enables it to retain the best possible concentration of oils, moisturising factors and “good” bacteria, vital in keeping skin hydrated, healthy-looking and reducing inflammation.

With an altered pH level skin is subject to acne, sensitivity, inflammation, dehydration and acceleration of skin ageing processes.

- ✓ Protection from external agents
- ✓ Stop bacterial proliferation
- ✓ Healthy stronger skin
- ✓ More effective products and treatments

# phormulis

## Restore & Calm. 00 Perfecting pH barrier moisture mist

Exclusive formulation to help maintain the skin's natural barrier and calm, nourish and hydrate skin. It refreshes and regenerates the skin while preparing it for the skincare products that are applied afterwards.

### CONTAINS:

#### **Glycyrrhetic acid obtained from liquorice root extract**

which has an anti-reddening, soothing and moisturizing action.

#### **Hyaluronic acid**

stimulates collagen production and gives radiance and elasticity to the skin.

#### **Aloe vera**

known for its beneficial soothing and antioxidant properties.

#### **Rocket and prickly pear extracts**

a combination that helps protect all types of skin from environmental factors, strengthening its defences.

- Close the eyes and spray generously onto the face, neck and décolleté. Apply every morning on freshly cleaned skin.
- Used as an alternative to a toner
- Freshens make-up and restores glow

- When in flight it helps restore hydration levels
- Use after showering and physical activity
- Helps shield the skin from pollution
