CREATE GOND STYLE ART:

Gond art is a vibrant and unique style of tribal art that originated from the Gond people in India. It's all about using intricate patterns and bold colors to create beautiful pictures. Traditional Gond art often features animals, trees, and nature scenes. What makes it special is that artists use patterns made of dots, lines, and circles to bring their creations to life.

1. Materials: You'll need: black marker or pen, and watercolors in bold colors like orange, yellow, green, and blue.
2. Use your black marker or pen to draw lines, dots, and geometric shapes inside the outlines of the tigers and the tree. You can make up your own patterns or look at examples of Gond art for inspiration.
3. Once you've finished adding patterns, paint your art.
4. After the paint dries, use your black marker or pen to outline the shapes and add any additional details to make your artwork pop (you can even use white paint or pens to add even more details).
5. You've created beautiful art inspired by Gond art. Now that you know the technique, use the style on your own sketches!
