

# ASSEMBLY GUIDE

## REFERENCE:

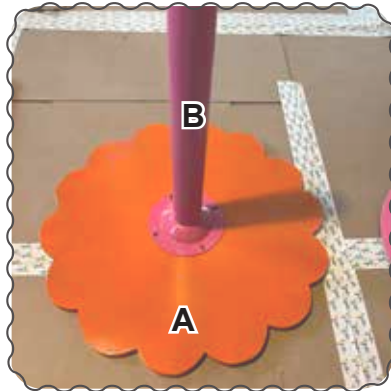

- A. Top
- B. Column
- C. Base
- D. Bits

## APPROXIMATE TIME:

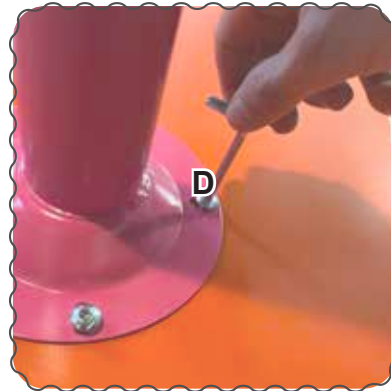

15 minutes

## STEP BY STEP:

Next Page 

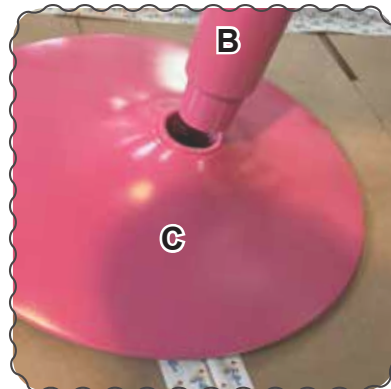

**STEP 1:** Align the column with the top so that the slots in the column overlap with the holes in the table underside where the receiving screws are.

**STEP 2:** Use provided allen key to screw in your 4 retaining bolts. Tighten until snug. Do not overtighten.

**STEP 3:** Turn your table over holding from the column.

**STEP 4:** Slot the column into the base, wiggling back and forth as needed to fit snugly in.

**STEP 5:** The column fits into the base like so, do not push past this point.

**STEP 6:** Your table is ready to go. Do not sit on your table. Wipe your table down with a cloth when it gets wet. Treat your table nicely and it will last a long time :)
