

# 선반 PEG SHELF

## 선반 means Shelf

This shelf is handmade from Monterey Pine and Eastern Poplar. It hangs via d-rings affixed on back, and can be hung vertically or horizontally. The pegs will confidently hold hats, scarves, a light jacket, and the shelves will happily hold items like keys, wallets, and a couple books etc.

## Install Instruction

1. Hold shelf board against wall and mark with pencil in D-ring where to hammer nail, or hook. This can be done in either the vertical or horizontal configuration.
2. Hammer in your nails or hooks.
3. Hang your shelf :)

## Care and Misc Info

Your shelf is made from solid pine wood, and the pegs are made from poplar and are coated in enamel. When you insert your pegs, push light and twist for pressure. The pegs should fit snugly. Don't be afraid to push hard. When you push the pegs into the pegshelf paint may come off, or scrape against the interior of the shelf hole. This is okay! These parts of the pegs remain hidden anyways.
