_	Match Your Liquid:		

Take a sample of your water and match the liquid to our color-coded chart

Advanced Personalization to Truly Make It Yours

Set Up Your Account

Create a myHTH account to take full advantage of the HTH[™] Test to Swim[™] app features, like personalized recommendations, water test history and more. With a single sign-up, you can now access your myHTH account both in the app and online at <u>HTHPools.com</u>!

Watch, Read & Learn: Tools & Resources

From how-to videos to care guides, access an entire library of resources from the palm of your hand to help you address and solve common pool problems.

Easy Account Setup: myHTH

You'll be prompted to create a myHTH account after downloading and opening the app for the first time.

It takes just a few minutes to add your basic contact information, along with your current pool or spa dimensions.

It's worth it. When it comes to testing your water, setting up your account ensures we send you the most accurate information based on the number of gallons of pool or spa water you're treating. **Plus,** save and review your water testing history, access helpful resources and more.

Even better, it's one and done! After setting up your myHTH account on the app, you can access your account at <u>HTHPools.com</u> using the same credentials. Don't have time right away? You may choose to bypass this step by tapping **Sign Up Later**.

FAQs

1. How do I correctly input the pool/spa capacity or pool dimensions?

We measure everything in feet. It's best to only use numbers and decimals when entering the dimensions of your pool or spa into the app. In other words, if your pool is 8 ½ feet deep, simply add 8.5 in the Depth field. Similarly, if your spa is 3 ½ feet deep, add 3.5 in the Depth field.

2. I entered the wrong dimensions for my pool/spa when I first set up my account. How can I update dimensions, gallons or any other information in myHTH account?

- 1 From the app, click myHTH in the lower right corner to see your account information. If you're on the website, you can also access your account by clicking on the myHTH logo in the upper right corner (desktop) or by clicking the menu dropdown in the upper right corner (mobile).
- 2 Click the Edit link next to the General Information headline and scroll down to make whatever changes you'd like.
- 3 When you're done, simply click the bright red Update User Info button at the bottom of the page to save your changes and you're all set!

3. Do the product recommendations change based on the size of the pool or spa I entered into myHTH?

Yes, they do – you want to ensure that you correctly input your pool dimensions to get the most accurate recommendations personalized specifically for your pool or spa.

4. I forgot my password; how can I reset it?

Forgot your password? No problem! Just tap <u>Forgot Password</u> from the Welcome screen. You'll receive an email with a temporary code and instructions for accessing your account.

Need another way to test your water?

Snap a photo of your test strip within 20 seconds of testing your water and text it to **484-123**.

(Note: you'll need to opt-in to text messaging the first time you use this option.)

Helpful hint: When you take your photo, be sure to lay the test strip on a solid, dark surface, so we can easily distinguish the test strip from the background.

Within seconds, you'll get a response asking you to enter your pool volume. Followed by a text message with the specific products and the correct dosing your pool needs.
