

## Straw Glider Instructions

### Build & Fly: Straw Gliders

Your challenge is to construct and launch a NEAM straw glider.

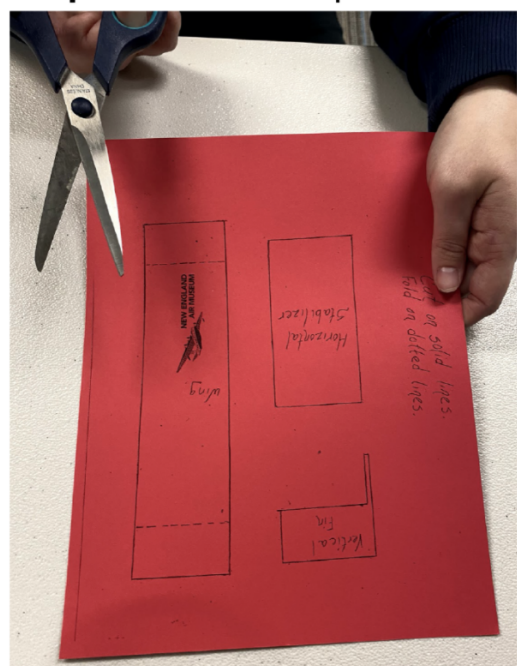

#### Instructions:

**Materials:** Straw Glider Template, straw, four (4) paper clips, tape, scissors, markers (optional)

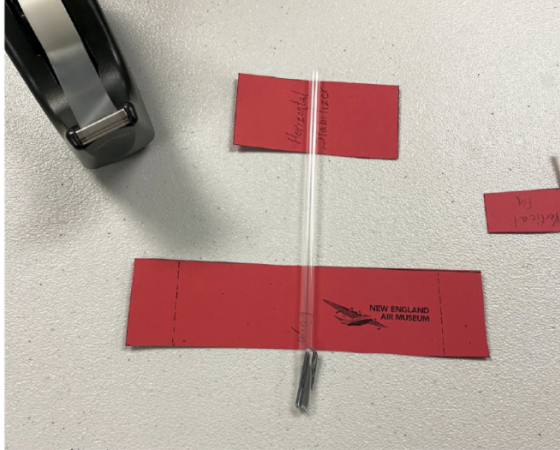

**Step 1:** Create your fuselage. Grab a straw and insert four (4) paper clips into one side.

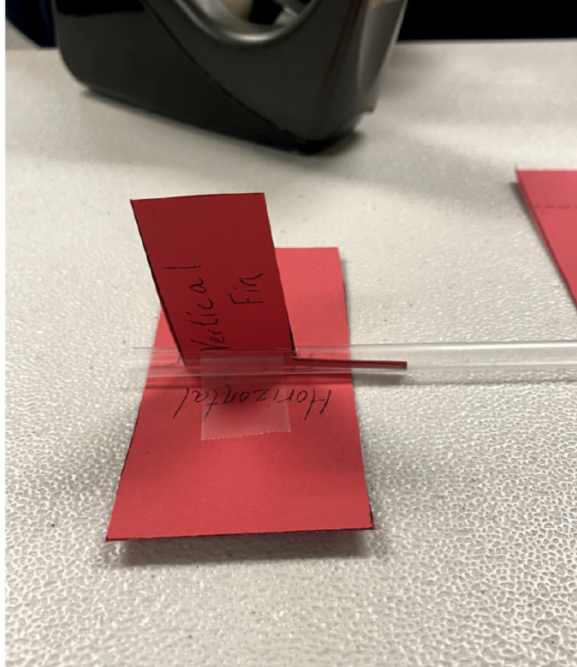

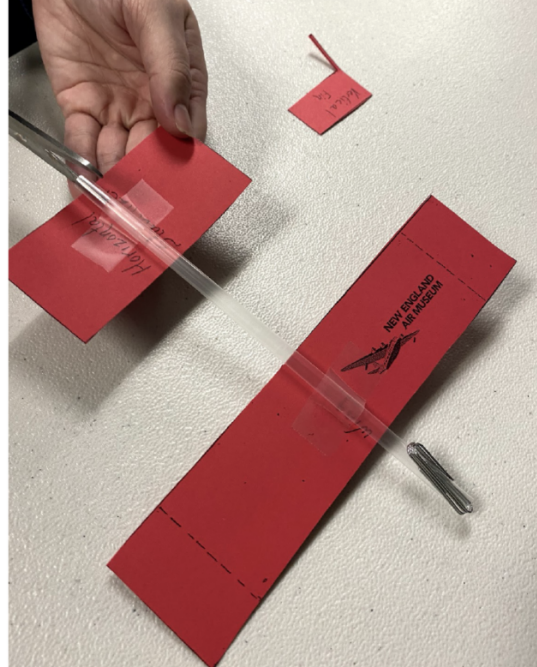

**Step 2:** Cut out shapes from the straw glider template on the solid lines.

**Step 3:** Take the two rectangular pieces and line them up with the straw down the middle. Put the smallest piece to the side from now. Secure the straw to the rectangles with tape.

**Step 4:** Cut a line in the back of the straw near the smaller rectangle. Insert the smallest piece and secure with tape.

**Step 5:** Fold up the edges of the long rectangle on the dotted lines. You're finished! Just throw your glider with the paper clips in the front.
