

Foam Flyers Instructions

Build & Fly Challenge: Foam Flyers

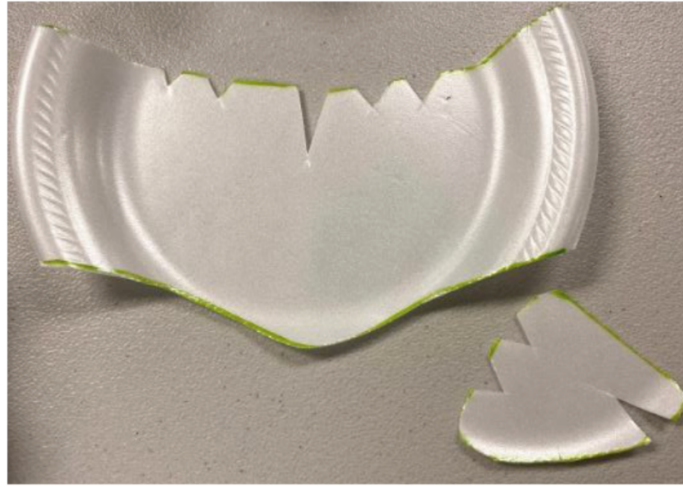

Learn about the science of wings and build your own "flying wing" foam glider.

Instructions

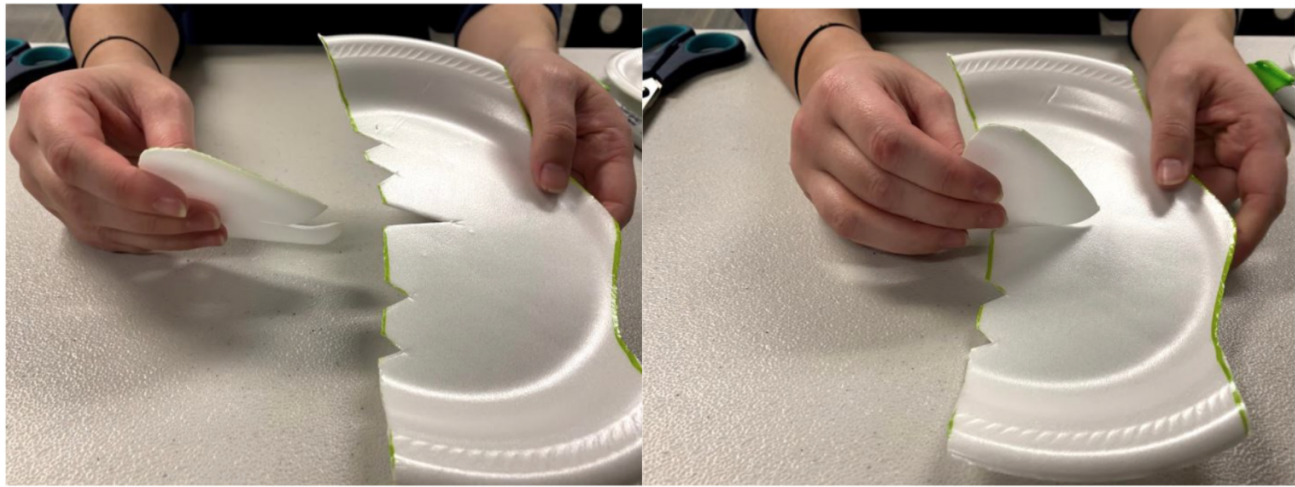

Materials: Foam flyer template, 9 inch styrofoam plate, penny, marker, scissors, tape

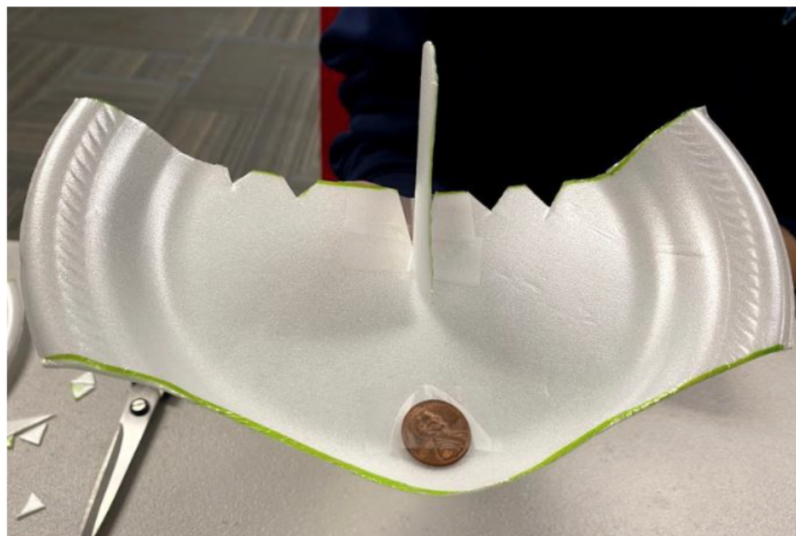

Step 1: Using the template, trace the wing and tail onto the styrofoam plate

Step 2: Cut the foam plate along the traced template until you have a wing and a tail section

Step 3: Slide the tail section into the slot on the wing and tape it into position

Step 4: Tape penny onto the nose of the flyer. Happy flying!
