PARIS RHONE

4K UST Laser Projector
Quick Start Guide
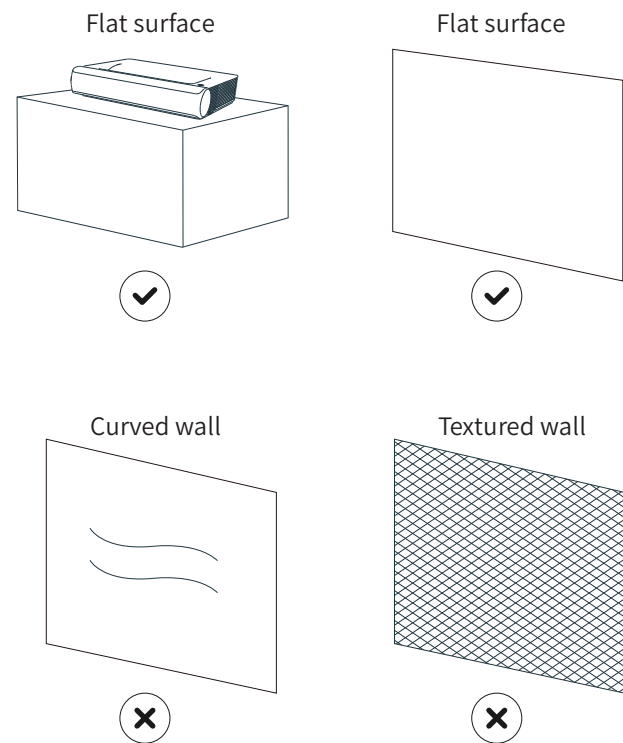

PE-LT002

| 4K HDR | 150° | 0.233 | Rec.709 |

dts HD.   Dolby Audio

1

The Parisrhone Venus 4K Projector and the projection area require a flat surface to produce an even image. In most cases, a distorted image is caused by an uneven surface such as a curved or textured wall.

Flat surface

Curved wall

Textured wall

Leave enough cooling space (at least 11.8 inch on each side) for the projector.
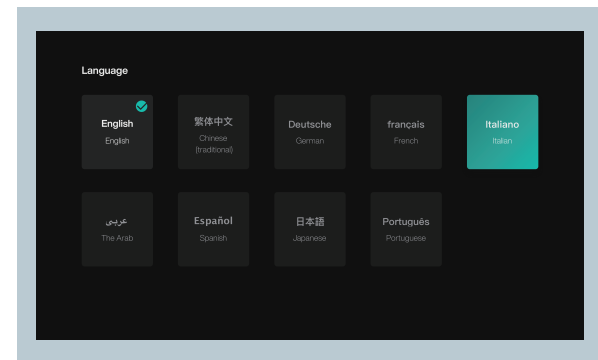

11.8 in

11.8 in

For optimal projection, it is recommended to use in a dark environment. A screen compatible with ultra short throw projectors can be used to enhance your viewing experience.

Use in a dark environment.

Elevate your experience with an ALR screen.

2

Select a system language (default: English).
You can select Traditional Chinese, German, French, Italian, Spanish, Japanese, Portuguese, and Arabic.
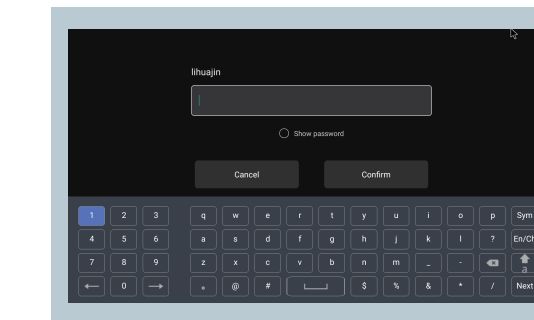

Language

| English | 繁體中文 | Deutsche | Français |
|
Español | 日本語 | Português | Italiano |

3

Press and hold the Return and Menu buttons simultaneously for 3 seconds to pair the remote control via Bluetooth. Make sure:
a) the batteries are installed in the remote control
b) the projector is turned on by pressing the power button
c) the remote control is close to the projector (within 5 meters)

Connect Remote   Skip >

4

Choose and connect to your network of choice.

Made in China

5

Fine-tune the projection with Keystone Correction/Electric Focus.

Keystone Correction   Electric Focus

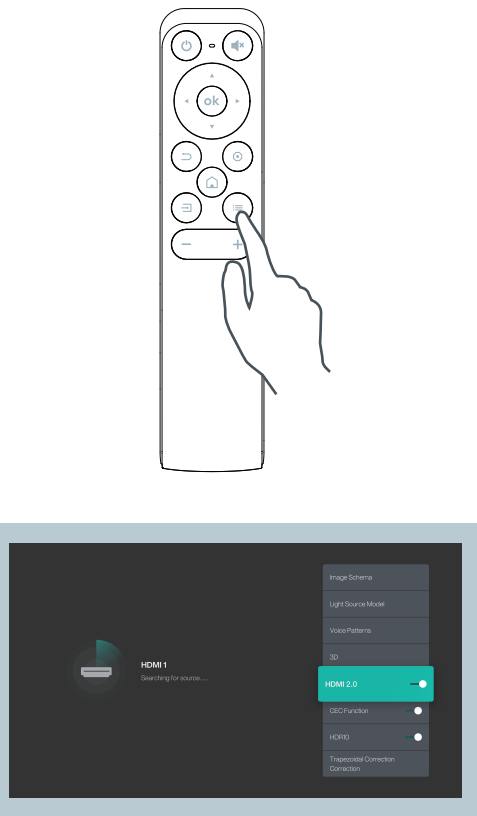

6

Select the time zone and format.

7

Then you can start viewing your files through the HDMI ports/USB ports
or get apps from the App Store.

8

In the HDMI interface, press the Menu button to enter the submenu
interface. Turn on HDMI 2.0 to support 4K 60 Hz output and HDR10.

9

Most technical problems can be solved by rebooting the projector.
Hold the Power button down until it turns off, then press once to turn on.
If the problem persists, perform a Factory Reset:
Go to Settings -> General -> Restore Factory Settings.
