

## Strap Keeper for Bellroy Backpacks Instructions

This plastic clip stops straps from slipping on backpacks like the Bellroy Chimera, Venture Backpack, and Transit Workpack. It also fits other Bellroy backpacks using the same buckle as shown in the photos.

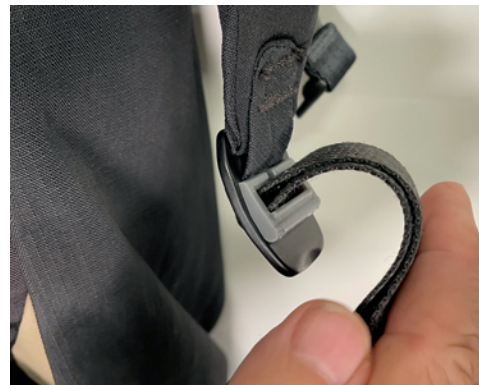

Details and backstory at  
<https://OctoSafety.com/StrapKeeper>

To install, follow these simple steps:

### Step 1

Pull both lower straps through the top gap into the clip, as shown in the photo. The bottom bar of the clip will stay visible from the front.

### Step 2

Make sure the front of the clip is pointing to the back of the Bellroy buckle. Now push one and then the other side of the clip's top into the center opening's sides. The clip should now hold onto the buckle.

### Step 3

Check that the clip and buckle are perfectly aligned. The clip has a small lip that extends into the lower opening.

Enjoy!
