T&T LABEL INTRO

The following components are described in order of their appearance on the cartridge SKUs:

- PRODUCT TYPE

T&T has 3 types of needles:

"A" - T&T Awe Needle

"B" - T&T Max Needle

"C" - T&T Era Needle

- DIAMETER/SIZE

T&T offers 3 tattoo needle diameters:

"08" - 0.25MM

"10" - 0.30MM - Bugpins

"12" - 0.35MM - Standard

- NEEDLE POINTS

The next number you see is the count of needle points in a configuration.

- CONFIGURATION

RL - Round Liner

RS - Round Shader

M1 - Magnum

RM - Round(Curved) Magnum

F - Long Taper Flat

- LENGTH/TIGHTNESS

Since the tightness of a configuration also depends on its taper length, we identify the taper length/tightness of a liner right after mentioning your chosen configuration:

"T" - Super Tight

"L" - Long Taper

PACKAGING *INTRO*

T&T Tattoo Device Inc. packages all cartridges based on manufacturing batch. Every package contains 20 individually packaged and EO sterilized tattoo needle cartridges of your chosen configuration.

IF YOU EXAMINE THE BOX, IT WILL GIVE YOU THE FOLLOWING INFORMATION:

- Quantity of individually packaged cartridges
- SKU number defining the items
- LOT number, which identifies the batch
- Date of production
- Date of expiration

EACH INDIVIDUAL BLISTER PACKAGED CARTRIDGE CONTAINS SPECIFIC INSTRUCTIONS AND EASY-TO-READ LABELS. THIS INCLUDES:

- SKU, identifying the type of cartridge you are about to use
- Expiration date
- Sterilization warning and identifier, which turns orange when the cartridge has undergone sterilization

TAPER LENGTHS

To ensure that all of your tattooing needs are met, different configurations have different taper sizes:

- TIGHT LINERS (6-7MM)

The range between 6-7 MM allows it to produce tight configurations for lining and filling out finer details while tattooing.

- ROUND LINERS (4MM)

Made with 4MM tapers to ensure a good and tight fit of various needle points that would hold the ink and decrease spillage.

- SHADERS, MAGNUMS, ROUND MAGNUMS (1.8MM)

Have a 1.8MM taper size that allows for a better ink flow, especially when it comes to thicker lining, shading, and color packing.

- LONG TAPER MAGNUMS, LONG TAPER ROUND MAGNUMS, FLATS (3.5MM)

All long taper mags/curved mags, as well as flats, are made with a 3.5MM taper.

SIZED TUBE INTRO

T&T Needle just as traditional needles have specially sized tubes. The following are the cartridge shell numbers with their needle configurations pairings:

RD3	RD5	RD7	RD8	RD9	RD14
