CUT OUT TEMPLATE

CAUTION!

Before drilling or cutting any holes please investigate the layout of your vehicle.

If possible keep the speakers away from any wiring harnesses, brake lines, fuel lines or the fuel tank.

If this is not possible then extra care and attention should be taken when cutting / drilling any holes in the vehicle.

Ensure that the speaker when fitted will not catch on any moving parts such as door / window handles.

If mounting in a door check that the window can still be fully lowered before installing.
