Large format tile ▶ Up to 1,148 linear feet

Mosaic ▶ Up to 160 sq. ft.

Coverage rates are indicative.

Packaging:

24 OZ (710 ml) 12 spray bottles per box

WHAT IT'S FOR

- Eliminates fresh cement grout residue during installation, before it cures.
- Effective on grout with additives.
- Ideal for cleaning the back of large format tile prior to installation.
- Perfect for cleaning grouting tools.

ADVANTAGES

- **RAPIDDRY TECHNOLOGY:** dries quickly, to be used during installation.
- No foam, no rising necessary.
- Does not damage grout joints.
- Does not damage or corrode aluminum and steel trims.
- Use indoors and outdoors, ideal for floors and vertical surfaces.
- High coverage.
- Safe for the installer and the environment: does not emit harmful fumes.

HOW TO USE IT

Ready to use.

Spray **INSTANT REMOVER** when the grout has thickened and darkened, according to the grout manufacturer's instructions (usually about 10 to 30 minutes). Let sit for 1-2 minutes. For textured tile, let sit for 5-10 minutes. Clean using a damp sponge trowel. For stubborn stains, repeat the above instructions after one hour. Refer to the grout manufacturer's instructions for indications about when the surface is safe to use.

Caution: Do not use on acid sensitive materials. Do not use abrasive sponges. Test the product before use to determine the material's resistance and the dwell time required for the product to reach maximum effectiveness.

Storage temperature: between 41°F and 86°F (5°C and 30°C).

Must be applied at temperatures between 41°F and 86°F (5°C and 30°C).
