SeroVital®

THE BEAUTY OF SCIENCE

Our goal is to make your life even more beautiful with science. That means clinical studies, research that's been presented around the world, and products that have created an entirely new well-beauty category in the anti-aging industry.

- + Cutting-edge research
- + Clinically validated ingredients
- + Category-defining formulas

That's the beauty of SeroVital.

AMERICA'S #1
Anti-Aging Therapy

SeroVital is scientifically developed, clinically tested, and backed by 15 patents. It can naturally boost mean HGH levels by 682%.* It's the only product with this result.

HGH is a critical peptide that has been associated with initiating multiple beneficial effects throughout the body, such as strengthening the underlying structure of your skin, stimulating collagen production, causing fat cells to shrink, supporting the immune system, and more.

Also, some experts believe HGH can help reduce fine lines and wrinkles, boost mental acuity, decrease body fat, promote deeper, more restorative sleep, and increase energy.

KEY BENEFITS

Boosts natural production of HGH.* HGH is associated with:

- + Reducing wrinkles
- + Increasing energy
- + Stimulating collagen production
- + Deeper, more restorative sleep
- + Decreasing body fat
- + Mental sharpness

KEY FEATURES

- + Hormone-free
- + Protected by 15 patents†
- + Backed by 4 clinical trials

KEY INGREDIENTS

- + Patented Renewal Complex†

Validated by Science. Proven by You™

SeroVital's 4 Clinical Trials

1

The original SeroVital study was a crossover, placebo-controlled, double-blind, randomized clinical trial —the gold standard in the research community. In the study, subjects' serum (blood) HGH levels increased significantly just 120 minutes after a single serving of SeroVital.*

2

A separate study provided compelling evidence that SeroVital works by inhibiting somatostatin, a hormone that clogs up both the pituitary and its delivery system, preventing the release of optimal HGH levels.*

3

SeroVital was shown to improve VO₂ max, which translates directly into support of endurance, energy, and vitality.*

4

SeroVital was also shown to dramatically decrease the time it takes to fall asleep, as well as reduce time awake at night by an average of 65%. Together, these measurements show that SeroVital improves overall sleep efficiency for deeper, more restorative sleep.*

DIRECTIONS:

Adults take 4 capsules with water on an empty stomach, either in the morning 2 hours before breakfast or 2 hours after dinner prior to bedtime. **Do not eat or drink anything but water 2 hours before or after taking SeroVital.** Do not exceed 4 capsules in any 24-hour period. Individual results may vary.
