**Skirt Length:** (in inches) \_\_\_\_\_ **Tie Downs:** (circle one) 2   4   NONE

**Radius Corners:** (circle one if applicable) 2"   3"   4"   5"   6"   7"   8"   9"   10"   11"   12"   Other: \_\_\_\_\_

**Cut Corners:** (in inches if applicable) \_\_\_\_\_

**TIPS: #1:** Always measure in inches. **#2** Always measure to the widest part of your spa. **#3** If your old cover fits well measure that. **#4** Mark Hinge Direction (if no hinge is marked we split the largest dimension in half).

**Rectangles must mark hinge direction.**  
Draw a line through diagram above to indicate hinge (if no hinge is marked we will split the largest dimension in half).

**Special Notes:**

**Measuring a Radius Corner**

The dash line represents what you need to measure!

Place a carpenter's square up against the corner and read the inside measurement where it touches the cover. For corners only ALWAYS ROUND DOWN to the next LOWEST inch! NEVER ROUND UP!

We have an easy radius sheet available on our website. You can place the easy radius sheet up to your spa and it will tell you the measurement.

**Must circle Radius above on Radius Corners line.**

## Agreement between Dealer and Spa owner

Cover specifications above were provided by Spa Owner. Owner assumes all responsibility for cover specifications. All information pertaining to order must be noted on order form. Separate conversations cannot be taken into consideration. Tie down location is not guaranteed but we will provide all new hardware for mounting. Due to foam taper and hinge width covers may appear about an inch larger when measuring from handle to handle, this is normal. Any cancellation or changes must be made within 1 hours or placing order as everything is custom.
