

## **Dipstick Tube Installation Instructions**

- 1. Although it's not mandatory, we recommend you install the dipstick tube while performing an oil change, as the task is much easier to accomplish with the oil filter removed and out of the way.**
- 2. (Optional) Drain oil from engine and remove oil filter**
- 2. Remove OEM dipstick tube by taking off bolt attaching dipstick to engine and remove dipstick from engine**
- 3. Remove o-ring from original dipstick tube being careful not to damage and remove dipstick from tube.**
- 4. Place o-ring on New Tube then install tube onto engine.**
- 5. (Optional) Install new oil filter and oil.**
- 6. Place dipstick in new tube to and complete oil level check.**
